

# Rappahannock Area Community Health Assessment

Completed in partnership between the Rappahannock Area Health District (RAHD) and Mary Washington Healthcare (MWHC)

**Mary Washington  
Healthcare**

## Shared Vision and Values

In an effort to ensure that all partnering organizations were working toward the same goals, Rappahannock Area Health District (RAHD) and Mary Washington Healthcare (MWHC) prioritized time at the onset of the Community Health Assessment (CHA) process to identify the shared vision and values of the entire CHA team (this included the Core Team, Steering Team, and Locality Workgroups, defined on pages 9 and 10). Together, the groups formed a vision statement that will guide the process toward the desired end result as well as a set of values that will ensure that the intent behind both the CHA document as well as the proceeding Community Health Improvement Plan (CHIP) remains intact.

The shared Vision and Values statements are a reminder that each organization is working toward shared goals, and that regardless of the focus of any particular organization, each has something valuable to contribute to a healthier community.

---

### **Vision:**

An inclusive, safe, and supportive community where each individual is able to reach their highest level of health and well-being.

---

### **Values:**

- Addressing health equity and disparities
  - Cultural competency
  - Meaningful data collection and sharing
  - Commitment to coalitions and partnerships, working together to accomplish health improvement in our community
-

# Rappahannock Area Health District (RAHD) and Mary Washington Healthcare (MWHC) Overviews

RAHD is a 1,388-square mile regional health entity composed of five localities in northeast Virginia including Caroline, King George, Spotsylvania, and Stafford counties, as well as the City of Fredericksburg. This area is also known as Planning District 16 (PD16) in accordance with the Planning District Commissions outlined in the Virginia Regional Cooperation Act. This term is frequently used to identify the area by many community partners and community members.

RAHD serves a population of 382,930 people per the 2020 census estimates. The locality populations range from 27,381 (King George County) to 156,748 (Stafford County). RAHD is composed of both urban and rural areas; RAHD localities cover a wide range of rural population percentages, from 1.2% rural in the City of Fredericksburg to 78.4% rural in King George County. PD16 has seen a tremendous amount of growth over the last decade. According to the US Census Bureau, Stafford County is the 5th fastest growing county in the state, and Spotsylvania is the 7<sup>th</sup><sup>1</sup>. The City of Fredericksburg has seen the highest population increase with 21.1% and Caroline County with the lowest with 7.8% (see graph on pages 26 and 27). According to the University of Virginia Weldon Cooper Center, Demographics Research Group, the population in RAHD is expected to increase, on average, 16% by 2030<sup>2</sup>.

In addition to PD16, MWHC's additional service areas include Westmoreland, eastern Orange, and southern Prince William counties, covering approximately 405 square miles.<sup>1</sup> It should be noted that the data presented for these counties will be reflective of the entire county, unless otherwise indicated. The populations served in each locality range from 18,477 in Westmoreland to 63,216 in southern Prince William County according to the 2020 census, of which Westmoreland and Orange County are defined as rural<sup>3</sup>. In these areas, the population is expected to increase, on average, 10.5% by 2030.

## Previous Community Health Assessments/Community Health Needs Assessments (CHAs/CHNAs)

In previous years, RAHD and MWHC have each done separate assessments, in public health this assessment is referred to as a CHA, and in the hospital setting it is referred to as the CHNA. In an effort to reduce redundancies in surveys, key informant interviews, and other data collection methods, it was decided that a partnership between the two entities would be beneficial to everyone involved. The following are references to previous assessments from RAHD and MWHC.

---

### a. RAHD City of Fredericksburg CHA - 2017

RAHD completed a CHA specific to the City of Fredericksburg in 2017. The assessment was conducted using the Mobilizing for Action through Planning and Partnership (MAPP) tool, which provides steps for evaluating and action planning to improve community health services and outcomes. Guided by the tool, the assessment was planned in late 2016 and conducted in 2017. At the beginning of the assessment, more than 50 stakeholders were identified, oriented about the process and trained on the assessment tool. Following this, a general CHA team, steering committee, and workgroups were formed.

---

<sup>2</sup>Census Population Estimates, 2010.

<sup>3</sup>University of Virginia Weldon Cooper Center, Demographics Research Group, 2019.

Before launching the assessment, the CHA team developed a vision statement. During the assessment phase, both quantitative and qualitative data were collected, forces of change were examined, and the performance of the local public health system was assessed. Data collected from all types of assessments were analyzed and presented to the CHA steering committee.

**The committee was able to review the gathered data in three meetings and identified five priority strategic health issues:**

1. Food Insecurity: How can our community improve food security for Fredericksburg City residents?
2. Child Health: How can our community improve access to quality physical and mental health care, educational, food, and safe environment for children?
3. Access to Medical and Mental Health Care: How can our community improve access to primary and mental health services, including different types of subspecialty physicians?
4. Disparity in Neighborhood Quality: How can our community ensure that all neighborhoods have access to resources, recreational activities, transportation services, housing quality and have safe neighborhoods?
5. Population Growth: How can our community provide all kinds of resources to meet the needs of the increasing population?

RAHD subsequently initiated the CHA/CHIP process in early 2020 specific to Caroline County, but this project had to be paused due to competing health department demands associated with the COVID-19 pandemic.

## **b. MWHC CHNA-2019**

MWHC, in collaboration with community partners, conducted a CHNA in 2016 and 2019. The following is the Executive Summary from the 2019 assessment.

The goal of these reports is to offer a meaningful understanding of the health needs across the Rappahannock Region, as well as to guide planning efforts to address the greatest health needs. These reports provide a foundation for working collaboratively with key stakeholders in the community to improve health. Special attention has been given to identify health disparities, needs of vulnerable populations, unmet health needs or gaps in services, and input from the community.

The CHNA findings are drawn from an analysis of an extensive set of over 150 health indicators from national and state data sources and in-depth qualitative data sourced from community health leaders, non-health professionals, and community-based organizations. Specific attention was given to identifying and collecting information about vulnerable populations and/or populations with unmet health needs.

**The following significant health needs were determined through an analysis of qualitative primary and quantitative secondary data (listed in alphabetical order):**

- Access to Health Services and Preventative Care
- Behavioral Health and Behavioral Disorders
- Cancer
- Diabetes
- Exercise, Nutrition and Weight
- Heart Disease and Stroke
- Oral, Dental or Mouth Health
- Public Safety
- Sexual Health
- Substance Abuse
- Transportation

## i. Top Prioritized Needs

On August 28, 2019, MWHC staff, members of Be Well Rappahannock (BWR) and local community leaders came together to prioritize the 11 top health needs, determined through primary and secondary data analysis in a session led by Healthy Communities Institute (HCI). The HCI team presented the findings from the data analysis and facilitated group discussions which were followed by two rounds of prioritization voting. Three health needs were identified as top priorities through the prioritization process (listed in the order of the voting results):

1. Access to Health Services and Preventative Care
2. Behavioral Health and Behavioral Disorders
3. Exercise, Nutrition and Weight

## Community Health Assessment Methods

The CHA process involved the collection, analysis, and utilization of data to educate and mobilize communities, develop priorities, garner resources, and plan actions to improve the public's health. The process involved the systematic collection and analysis of data to provide the local public health system and the community with a sound basis for decision-making. This CHA was developed in partnership by RAHD and MWHC as well as dozens of other organizations in the community (see partner list in Appendix B).

### a. MAPP Process

This CHA utilized the MAPP framework, which is a validated, community-driven strategic framework developed by the National Association of County and City Health Officials (NACCHO). The MAPP framework is deployed to improve the health and quality of life of individual communities and advocates community involvement in each of its assessments. This framework is composed of six phases and includes four assessments to gather comprehensive data. These phases and assessments are identified in Figure 1.

The CHA process progressed through the first three phases of the MAPP assessment: Organizing for Success and Partnership Development, Visioning, and the Four MAPP Assessments. Completing these three steps marks a major achievement toward understanding not only our community's health needs and challenges but also the strengths and assets that can be leveraged to improve overall health and well-being.

Data from the MAPP assessments will serve as the basis for developing the CHIP, which will be carried out by a variety of organizations throughout the community. This data will also be used internally by RAHD to update the agency's Strategic Plan. The CHIP process, to be completed in the spring and early summer of 2022, will follow steps four through six of the MAPP process.

**Figure 1:** NACCHO MAPP Model  
(National Association of County and City Health Officials)

---

**The majority of the following pages of this report reflect the results from the four MAPP Assessments. A brief summary of each assessment is provided below:**

- Community Themes and Strengths Assessment (CTSA) -- Provides qualitative information on how communities perceive their health and quality of life concerns as well as their knowledge of community resources and assets.
- Local Public Health System Assessment (LPHSA) -- Measures the capacity and performance of the local public health system by surveying the majority of organizations and entities that contribute to the public's health.
- Forces of Change Assessment (FOCA) -- Is aimed at identifying forces, such as trends, factors, or events that are or will be influencing the health and quality of life of the community and the work of the local public health system.
- Community Health Status Assessment (CHSA) -- Provides quantitative data on a broad array of health indicators, including quality of life, behavioral risk factors, and other measures that reflect a broad definition of health.

A community asset list was compiled to identify resources in each locality that can be used to counter some of our most pressing health concerns (see Appendix C)

---

## **b. Structure**

Due to threats posed by the COVID-19 pandemic, some elements of the MAPP process had to be modified, and all meetings were held virtually to ensure the health and safety of participants.

**Following structure from the MAPP process, the following groups were established and met regularly:**

- **A Core Team** consisted of representatives from RAHD and MWHC. The group met weekly to plan and manage the overall CHA project, and they also carried out the work of identifying community partners, planning and facilitating meetings, documenting the assessment process, and writing the report. A full list of names and job titles serving on the Core Team is available in Appendix B.
- **The Steering Committee** consisted of leaders in the community who serve all of PD16 and/or represent a key area of the local public health system (e.g. public schools, local governments, private medical practices). The Steering Committee oversaw the progress of the CHA, informed key decisions, and served as subject matter experts in the completion of the LPHSA. The group was composed of members of the BWR Council and other community-based organizations for the purpose of creating a broader community-based coalition to provide direction for the community health assessment. BWR was formed in 2017 as a response to the need to bring together key community stakeholders to help facilitate health improvement initiatives by providing strategic direction, advocacy and active engagement. The council is composed of agencies representative of the community, with a deep concern for the health and well-being of the residents of the Rappahannock Region. The stated purpose of the council is to "...identify priority community needs; provide advice, oversight, and stewardship to planned community improvements; and monitor progress on priority health and social concerns impacting the Rappahannock Region".
- **Work Groups** were established for each of the five localities in PD16. This represented an adaptation of MAPP due to COVID-19. The necessity of a virtual model allowed enough time and resources to hold separate working groups composed of partner organizations local to a specific county or city, allowing for locally focused input than might otherwise have been achieved. The work groups provided ongoing feedback and assisted with completion of the FOCA and the CTSA.

---

Partner work from both the Steering Committee and Work Groups included establishing the vision and values as well as collecting data on health status, health needs, community assets, resources, and other determinants of health. A full list of organizations represented in each group is available in Appendix B.

---

# Community Themes and Strengths Assessment

## a. Overview

A comprehensive assessment process is critical to the success of the MAPP initiative. The CTSA was used to help provide an overall picture of the health of the community. The survey focused on identifying respondents' perceptions of the community's greatest strengths, important health-related issues and concerns, and areas for potential improvement. Measuring the community's perception of its health sets the baseline of health needs of the communities for stakeholders and serves as the most direct form of community feedback completed in the CHA.

In November 2021, a community health survey was distributed throughout PD16 as well as MWHC's service area beyond PD16 in Westmoreland County, eastern Orange County, and southern Prince William County. Surveys were shared extensively by RAHD, MWHC, and community partners engaged in the Steering Team and locality Work Groups. A total of 1,978 survey responses were received (1,548 online survey responses and 430 paper copies).

Though the populations of respondents did not represent a statistical sample of the communities, great effort was made to ensure the proportion of responses from each demographic group reflected the demographics of the service area as a whole. As surveys were returned, RAHD identified demographics that were not returning as many surveys and sent teams to those areas to collect surveys in-person. The effort paid off, and RAHD and MWHC were able to match the respondent demographics to the actual population very closely, with the exception of an underrepresentation of the Hispanic/ Latino population and an overrepresentation of women.

## b. Summary of the demographic information of the respondents

Participants were asked to provide basic demographic information including zip code, gender, age, race/ethnicity, highest education level, and annual household income. A summary of the responses to those questions can be found page 11:

**Table 1:** Demographic information of the participants in the Community Themes and Strengths Assessment

	Attribute	Respondents (n)	Percentage (%)
<b>Areas/Locality</b>	Caroline County	268	14.2%
	City of Fredericksburg	325	17.2%
	King George County	170	9.0%
	Spotsylvania County	605	32.1%
	Stafford County	491	26.0%
	Orange County	10	0.5%
	Prince William County	3	0.2%
	Westmoreland County	15	0.8%
<b>Gender</b>	Man	459	24.3%
	Woman	1,325	71.6%
	Non-binary/Other	10	0.5%
<b>Age</b>	18-29 years	151	8.0%
	30-39 years	370	19.6%
	40-49 years	405	21.5%
	50-59 years	432	22.9%
	60-69 years	313	16.6%
	70 or older	216	11.4%
<b>Race/Ethnicity</b>	White or Caucasian	1,091	57.8%
	Black or African American	526	27.9%
	Hispanic or Latino	85	4.5%
	Asian or Pacific Islander	26	1.4%
	Native American or Alaskan Native	14	0.7%
	Multiracial	73	3.9%
	Other	4	0.2%
<b>Education</b>	Less than high school	23	1.2%
	Some high school	28	1.5%
	High school graduate or equivalent	277	14.7%
	Some college, but degree not received or in progress	345	18.3%
	Associate degree	165	8.7%
	Bachelor's degree	509	27.0%
	Graduate degree	485	25.7%
<b>Annual household income</b>	Less than \$25,000	188	10.0%
	\$25,000 - \$34,999	137	7.3%
	\$35,000 - \$49,999	150	7.9%
	\$50,000 - \$74,999	243	12.9%
	\$75,000 - \$99,999	207	11.0%
	\$100,000 - \$149,999	326	17.3%
	\$150,000 - \$199,999	206	10.9%
	\$200,000 and above	147	7.8%

Participants were asked to identify their community's top three greatest strengths, the top three most important health issues, the top three risky behaviors, and the top three things that would improve their quality of life. The following are the results for all areas combined (PD16 as well as the additional MWHC service area):

### c. Top three greatest strengths (number of responses)

1. A safe place to live (671)
2. Diversity of the community (social, cultural, faith, economic) (548)
3. Police, fire and rescue services (517)

### d. Top three most important health issues (number of responses)

1. Mental health problems (depression, anxiety, stress, suicide) (1051)
2. COVID-19 (841)
3. Alcohol, drug, and/or opiate abuse (657)

### e. Top three risky behaviors:

1. Drug abuse
2. Alcohol abuse
3. Not getting immunizations or vaccines

### f. Top three ways to improve quality of life (number of responses)

1. Affordable housing (912)
2. Mental health and substance abuse services (643)
3. Good jobs and a healthy economy (628)

Although looking at the top-picked answers for each of these four questions across the district is important, we also felt it was vital to analyze the data by demographics and the locality of each respondent. While doing so, it became apparent there were several points of interest; for the first health question regarding the greatest strengths of the community there was a trend for young adults (those aged 18-29 years old) and individuals reporting a household income of less than \$49,000 annually to choose diversity of the community as their number one answer, instead of a safe place to live as the majority indicated. Respondents from the City of Fredericksburg also tended to choose diversity of the community as a clear number one, followed by a walkable, bikeable community; the City was the only locality to mention a walkable, bikeable community as a strength. The City of Fredericksburg was also the only locality to include parks and spaces for recreation and opportunities to be involved in the community in the top five. Spotsylvania County respondents chose educational opportunities as their number one choice; Stafford County agreed this was also a strength for their locality and ranked educational opportunities as number two.

For the second health question, important health issues, individuals over the age of 60 and African Americans tended to choose COVID-19 as their top choice. This was not surprising as we know that the elderly have been severely impacted by the ongoing COVID-19 pandemic and we know that African Americans across the country have been disproportionately affected by COVID-19 infections. For the third health question, risky behaviors, individuals over the age of 60 again went against the grain; seniors overwhelmingly chose not getting immunizations/ vaccines as the top risky behavior. Interestingly, King George was the only locality where not getting immunizations, vaccines did not show up in the top five choices.

For the last question, improving quality of life, there were several demographic points of interest. Native American respondents tended to choose a healthy economy as the top choice and respondents identifying as non-binary tended to choose mental health and substance abuse services. We also saw a split in the top choice based on income for this question; individuals reporting a household income less than \$100,000 annually sided with the majority and chose affordable housing as the top choice while individuals reporting a household income over \$100,000 annually chose mental health and substance abuse services. When looking at the data by locality, we noticed that Caroline County respondents tended to choose good jobs and a healthy economy as the top choice and the City of Fredericksburg chose working to end homelessness as a top five answer; the City was the only locality to include this choice in their top five.

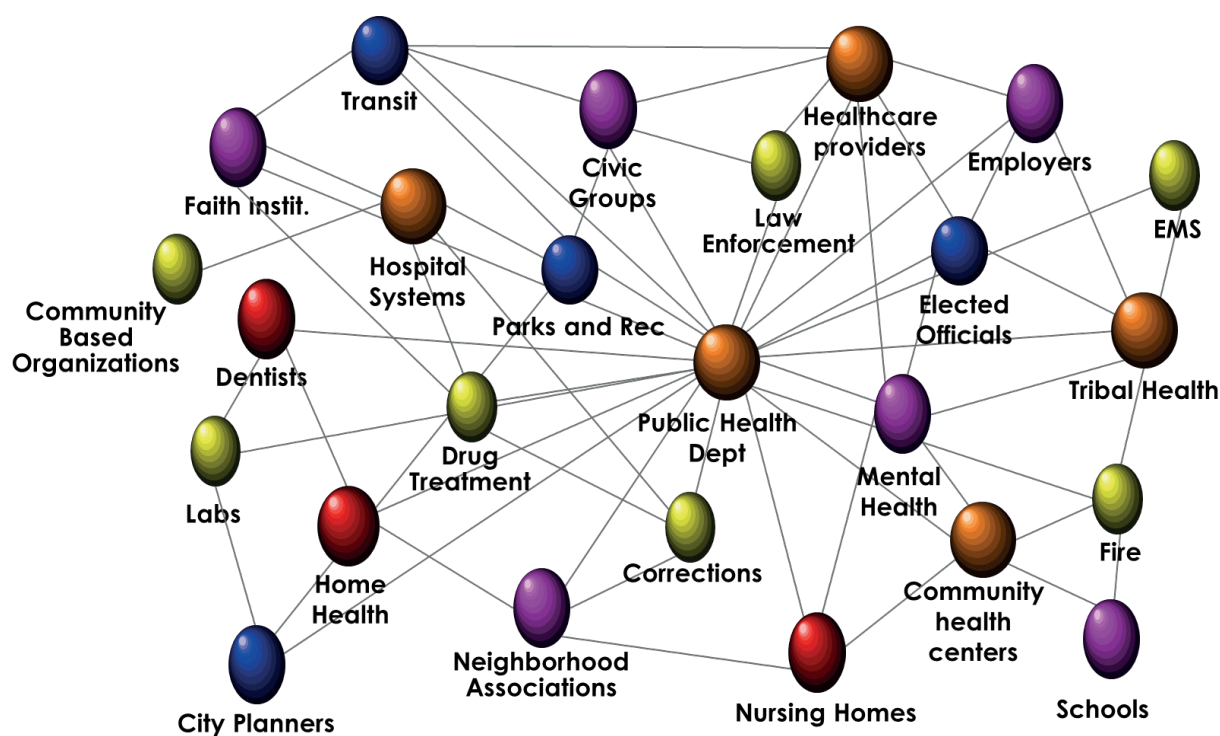

**Figure 3:** (NACCHO, Roadmap to a Healthy Community)

# Local Public Health System Assessment

## a. Purpose and Background

The local public health system is much larger and more diverse than just the local health department or doctor's offices and hospitals. There are hundreds of organizations, nonprofits, businesses, and government entities that comprise this system, some of which are depicted in Figure 2. The goal of this assessment is to not only assess how the system as a whole is performing, but to also have an in-depth conversation about each entity's role in this system and how the community can adopt Public Health 3.0 to become more efficient and impactful by delivering the 10 Essential Public Health Services.

The COVID-19 pandemic has shined a bright spotlight on the public health system. While it has highlighted much of the good work that everyone is doing, it has also shown that there is a lot of work to be done to improve this system. The first step to improving is to take an honest look at where we are at this moment.

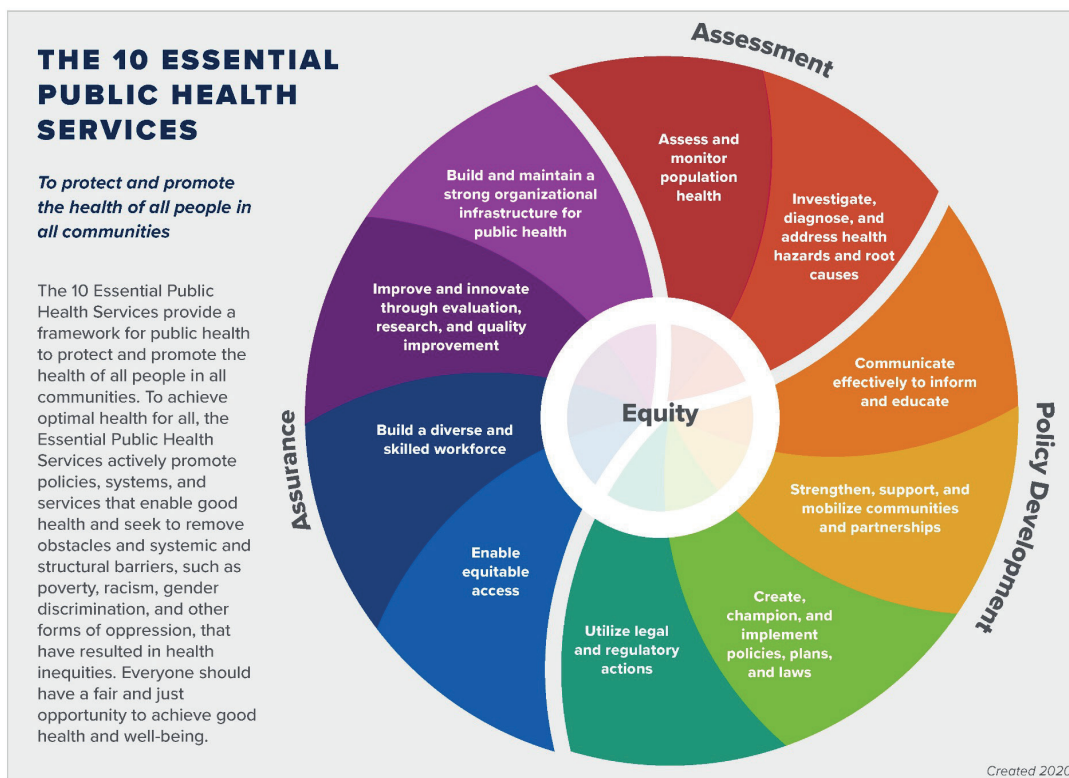

**Figure 4:** Graphical representation of a local public health system

The National Public Health Performance Standards Program (NPHPSP) assessments offer a helpful tool in evaluating the current performance of the local public health system against a set of optimal standards. This LPHSA report is intended to help all organizations who are a part of the local public health system gain an understanding of their performance within this system and to creatively address strengthening it.

According to the CDC: "The 10 Essential Public Health Services (EPHS) provide a framework for public health to protect and promote the health of all people in all communities. To achieve optimal health for all, the EPHS actively promote policies, systems, and services that enable good health and seek to remove obstacles and systemic and structural barriers, such as poverty, racism, gender discrimination, and other forms of oppression, that have resulted in health inequities. Everyone should have a fair and just opportunity to achieve good health and well-being."

**Figure 5:** Ten essential public health services<sup>5</sup>

## b. 10 Essential Public Health Services

- EPHS 1:** Assess and monitor population health status, factors that influence health, and community needs and assets
- EPHS 2:** Investigate, diagnose, and address health problems and hazards affecting the population
- EPHS 3:** Communicate effectively to inform and educate people about health, factors that influence it, and how to improve it
- EPHS 4:** Strengthen, support, and mobilize communities and partnerships to improve health
- EPHS 5:** Create, champion, and implement policies, plans, and laws that impact health
- EPHS 6:** Utilize legal and regulatory actions designed to improve and protect the public's health
- EPHS 7:** Assure an effective system that enables equitable access to the individual services and care needed to be healthy
- EPHS 8:** Build and support a diverse and skilled public health workforce
- EPHS 9:** Improve and innovate public health functions through ongoing evaluation, research, and continuous quality improvement
- EPHS 10:** Build and maintain a strong organizational infrastructure for public health

<sup>5</sup> Centers for Disease Control and Prevention.

## c. Methods

RAHD and MWHC conducted the LPHSA in November 2021 with the Steering Committee. A summary document was provided to all Steering Committee members (see Appendix D), and a brief overview of the 10 Essential Public Health Services (EPHS) was presented. After the presentation, discussion opened so that participating members could identify strengths and weaknesses in the delivery of each essential service. Finally, Steering Committee members were asked to rate each essential service on a scale of 1 – 5.

### The rating system for the standards was as follows:

- 1 – Not at all
- 2 – Minimally
- 3 – Moderately
- 4 – Significantly
- 5 – Optimally

## Results

The table below provides an overview of the local public health system's performance in each of the 10 EPHS.

**Table 2:** Local public health system performance in RAHD and additional MWHC service areas

	Essential Public Health Services (EPHS)	Average Score
<b>EPHS 8:</b>	Assure a Competent Public and Personal Health Care Workforce	<b>3.8</b>
<b>EPHS 6:</b>	Enforce Laws and Regulations that Protect Health and Ensure Safety	<b>3.75</b>
<b>EPHS 2:</b>	Diagnose and Investigate Health Problems and Health Hazards	<b>3.5</b>
<b>EPHS 4:</b>	Mobilize Community Partnerships to Identify and Solve Health Problems	<b>3.4</b>
<b>EPHS 10:</b>	Research for New Insights and Innovative Solutions to Health Problems	<b>3.3</b>
<b>EPHS 9:</b>	Evaluate Effectiveness, Accessibility, and Quality of Personal and Population-Based Health Services	<b>3.1</b>
<b>EPHS 1:</b>	Monitor Health Status to Identify Community Health Problems	<b>3</b>
<b>EPHS 3:</b>	Inform, Educate, and Empower People about Health Issues	<b>3</b>
<b>EPHS 7:</b>	Link People to Needed Personal Health Services and Assure the Provision of Health Care when Otherwise Unavailable	<b>2.9</b>
<b>EPHS 5:</b>	Develop Policies and Plans that Support Individual and Community Health Efforts	<b>2.5</b>
<b>Overall Performance Average</b>		<b>3.26</b>

## d. Conclusions

The local public health system is under increased pressure due to the COVID-19 pandemic, and there are societal changes that are required to effectively respond to the issues that have been brought to the surface, however all aspects of the response require political buy-in for the policy changes required. The feedback from the survey was thus heavily influenced by consideration of the participants of the political response to the pandemic, including participants with political appointments giving an assessment of their own performance. Most of the areas that were evaluated scored around “moderate”, with some being slightly better and some being slightly worse. Additional notes on the LPHSA voting can be found in Appendix D.

The local public health system scored best on EPHS 8 (Assure a Competent Public and Personal Health Care Workforce), EPHS 6 (Enforcing Laws and Regulations that Protect Health and Ensure Safety), and EPHS 2 (Diagnose and Investigate Health Problems and Health Hazards). Lowest scores were in EPHS 5 (Develop Policies and Plans that Support Individual and Community Health Efforts) and EPHS 7 (Link People to Needed Personal Health Services and Assure the Provision of Health Care when Otherwise Unavailable). These represent areas for improvement that the LPHS should consider when developing future strategic priorities, including in the CHIP.

### **The following quotations are from members of the Steering Team while conducting the assessment:**

Regarding Essential Function 2 (Diagnose and Investigate Health Problems and Health Hazards): *“DCLS, UVA lab, and VA Tech have been good at finding threats and alerting to those. The labs have been able to keep up with [communicable diseases] during the pandemic. Their capacity has actually expanded. Have done a great job with COVID and other diseases”.*

Regarding Essential Function 4 (Mobilize Community Partnerships to Identify and Solve Health Problems): *“Overall, (...) have done a good job, but have learned that we can’t use traditional means and approaches. Found that even simple things like advertising events require a nontraditional approach to truly reach the diverse audiences we need to serve.”*

**Overall Impressions:** After completing this assessment, here are some of the things the Steering Team had to say:

*“...had an opportunity to talk to community members, they were unaware of what we are doing, this brought to light the realization that we have a lot of work to do to integrate more into the community. Stafford is a bedroom community, but there are a lot of people that care. Just keep engaging and talking about what we are doing. We get so busy with our own work, and sometimes we forget that others aren’t aware of what we do. A lot more we can do and a lot of people who want to be involved.”*

*“I wasn’t aware of a lot of things that we are doing in the community – perception has changed for the better... didn’t know that we were doing all of this.”*

## e. Word Clouds

These are the words most frequently used when describing the top three ranked Essential Public Health Services in RAHD:

*These are the words most frequently used when describing the bottom three ranked Essential Public Health Services in RAHD:*

# Forces of Change Assessment

## a. Introduction

While the LPHSA evaluated the internal strengths and weaknesses of the local public health system, the FOCA evaluated the external opportunities and threats (referred to within the assessment as *factors, trends and events*) to the community.

This assessment was conducted in partnership with all five locality workgroups as well as the Steering Committee. Each group was introduced to the Forces of Change Assessment and was asked to consider what is happening within their community that could be considered a “force” (factors, trends, or events) that may impact the community in the future. The eight categories that were discussed are: economic, environmental, ethical, legal, political, scientific, social, and technological. Completing this assessment with all five workgroups and the Steering Committee was essential; each workgroup member brought forth their own ideas and expertise gained from living or working in a specific locality while the Steering Committee was able to consider PD16 as a whole. The localities in PD16 are very diverse from one another so hearing from each workgroup individually allowed for evaluation and discussion of forces specific to each distinct jurisdiction.

A table outlining the full feedback from each workgroup can be found in Appendix E.

**As indicated in NACCHO’s FOCA, eight categories of forces were thoroughly examined in order to respond to the following questions:**

- *What is occurring or might occur that affects the health of our community or local public health system?*
- *What specific threats and/or opportunities are generated by these (potential) occurrences?*

## b. Results

### Economic

A main economic factor identified by all groups was the increasing volatility of job markets causing a major workforce shortage among public works such as public health, schools, healthcare, and law enforcement. Groups reported difficulty maintaining public works and services due to high demand and low availability of employees. Residents are having to commute further to work each day and there has been a shift from living in more rural areas within the district to now living in the suburbs, especially in Stafford County where many of the residents are commuters to Northern Virginia via the newly expanded Express lanes. Groups stated that this consistent need to move to accommodate a job has led to poor continuity of care and education, as residents have to find new doctors or attend new schools.

Groups also noted there has been a rise in the lack of affordable housing attributed to inflation and increased cost of living in Northern Virginia. They stated this has caused many to live in multigenerational housing out of necessity and is contributing to generational poverty in some circumstances. Broadly, inflation has also caused the metrics used to determine eligibility for economic assistance to change and become more stringent. The City of Fredericksburg workgroup noted that the narrow zoning requirements for housing and high cost of land exacerbate the difficulty of securing affordable housing. Workgroups stated that among the new refugee population there has been a trend of having to move further south to secure housing, but ultimately moving north to Northern VA where social services are more readily available and their culture is more prominent in the community.

Stafford and Spotsylvania workgroups noted that the district has recently seen some significant opportunities for economic growth as well; a new clinic for Veterans is opening in Spotsylvania which will provide better access to care for the population. There are also several development projects that are ongoing in Stafford County including an Amazon warehouse which will provide over 500 new jobs to the area. All groups noted that this trend has been ongoing; opportunities for growth tend to localize in the more urban or suburban areas rather than the rural ones, healthcare included. In the more rural locality of King George, workgroup members reported difficulty accessing healthcare services, recalling stories of 40 minute ambulance rides to reach the nearest hospital in some cases. During the COVID-19 pandemic there has been increased funding for healthcare and social works but now there is worry among all groups about the outcome for residents when pandemic funding is cut off, specifically for single parent households and senior citizens across the district.

## **Environmental**

All groups acknowledged that with climate change came many environmental factors affecting the district. A few specifically mentioned were harmful algae blooms at Lake Anna in Spotsylvania causing health concerns and decreased tourism to the area, and more frequent coastal flooding along the Rappahannock River and the City of Fredericksburg. All groups also mentioned how climate change disproportionately affects low-income and rural communities in regards to health and economics. Caroline County workgroup members stated that residents have reported poor water quality in county wells and water bills higher than their electric bills in some instances. King George workgroup members also expressed concern over water quality and availability, noting that hydrants can be difficult to access at times and the water system (such as pipes for tap water and sewage) has not been adequately maintained.

## **Legal/ Political**

All groups agreed that following the 2016 and 2020 Presidential elections there was an increase in the polarization in politics, a divide which has grown wider during the pandemic. Groups identified this differing of ideals as the underlying cause of increased public violence (seen in schools) and misinformation, difficulty funding and maintaining public works leading to a lack of timely responses from officials on public concerns, and increased difficulty enforcing rules and regulations such as mask mandates.

There have also been large regulatory changes in the field of mental health recently, including the Marcus Act which focuses on reducing the possibility of “use of force” by law enforcement during behavioral health emergencies and deploying a mobile crisis or community care team instead. Mental health employees in the district have reported that these events have caused a high workforce burden and low retention rates, further exacerbating a well-known workforce shortage and making it difficult for residents to access mental health services. Due to the trend of state hospitals not being able to take as many mental health admissions, the responsibility falls to the localities themselves, noted workgroup members.

Finally, with the legalization of marijuana in 2021, workgroup members reported confusion among residents regarding the discrepancy between state and federal laws. Smaller localities have stated this has caused difficulty in enforcing the new laws.

## Social

All groups stated that the COVID-19 pandemic prompted an important discussion in PD16 around the sharing of information; PD16 is situated almost halfway between two major news outlets (Washington DC and Richmond, VA) but itself has only a few media sources to get information to the public. Groups pointed out that the lack of a large local media presence in the district led to a perceived increase in misinformation.

As more residents telework there was also an increase in social isolation, noted by all groups to have a negative impact on mental health. Being home more than usual created a need for many residents to eat at home, this became an issue due to reported difficulties accessing healthy foods in rural localities and the fact that healthier options were often more expensive.

The groups stated that there were also some positive factors during the COVID-19 pandemic; a new referral platform named UniteUs placed an emphasis on viewing health in a holistic way and is working to increase how connected the district's healthcare system is. Initiatives such as this have increased collaboration between community partners in recent years. Workgroup members noted that the set-up and planning process for this platform revealed inequities between demographics in the district, putting an emphasis on underlying health issues and a focus on the social determinants of health. An example of this is a strong focus on tackling food deserts in the district; over the past several months there has been great collaboration among food service groups to reach vulnerable populations.

Groups recognized that in tandem with the COVID-19 pandemic, a social justice movement began in mid-2020 recognized by many as "Black Lives Matter." Specifically in RAHD there were several in-person social justice marches and rallies, mostly in the City of Fredericksburg. Groups reported that these demonstrations led to increased awareness among the community about social issues and exposed the need for further education on the topic.

## Technologic/ Scientific

Groups identified that throughout the COVID-19 pandemic there has been a trend towards working to improve online and electronic security systems, largely influenced by a newfound emphasis on the importance of electronic software and databases for sharing and storing personal information. Groups noted that this is seen in the realm of healthcare, employment, and even in residents' personal lives via social networking sites. In addition, the increased importance and reliance on technology has created disparities in access to educational opportunities for school-aged children among varying socioeconomic groups and rural and urban populations. There is an apparent disparity in access to broadband internet in PD16, with very limited access in most in the rural areas.

## c. Discussion

Though it is not immediately obvious how all of the forces identified in this assessment are directly related to health, it is important to consider the trends, factors and events that impact not only our public health system but the health of our greater community, now and in the future. This information, considered in context with the Community Health Status Assessment, allows the community and key partner organizations to maintain a keener understanding of the many social determinants of health that greatly influence overall health outcomes.

# Community Health Status Assessment

## a. Introduction

This report provides quantitative data on a broad array of health indicators, including quality of life, behavioral risk factors, and other measures that reflect a broad definition of health. The CHSA provides the secondary data for the CHA. In conjunction with the first three assessments, which were all based on the perception of the community members and stakeholders, this report takes the data about each community and the district as a whole, and allows for identification of where the overlap is. This gives a better idea of where to focus on the CHIP.

The data used for this report was obtained from a number of sources, including the US Census Bureau, Mary Washington Healthcare, County Health Rankings, Virginia Department of Health, National Center for Health Statistics, Center for Disease Control, National Vital Statistics System, National Institute on Minority Health and Health Disparities, United States Diabetes Surveillance System, United States Department of Agriculture, Data USA, American Community Survey, City Data, Bureau of Labor Statistics, Eviction Lab, National Center for Education Statistics, American Medical Association, Centers for Medicare and Medicaid Services, National Provider Information, Area Health Resource File, Small Area Health Insurance Estimates, etc. This data was collected from November 2021 to January 2022 and will be updated annually in the form of addendums.

## b. Topics Covered in this Assessment:

- Overall Population Demographics
- Health Status Indicators
- Health Behaviors
- Social Determinants of Health

## c. Additionally, there are other resources that can provide more detailed information and insight on these topics and many others.

RAHD's CHA dashboard can be found on the RAHD website, and is accessible to all. The dashboard may also be shared as a link on any community partner websites or social media. RAHD would like to encourage everyone to take advantage of this useful tool. Please feel free to share with friends, family, community members, and clients.

MWHC utilizes the Community Health Information Resource (CHIR) tool. The CHIR tool is a data management resource that equips users to research hundreds of indicators related to the Rappahannock Region, with comparisons to local, state and national benchmarks. The database enables users to focus on Social Determinants of Health (SDoH), explore valuable analysis, build customized dashboards, locate promising practices, and much more. This resource can be found on the MWHC website and is publicly available to all. Link: <https://www.marywashington-healthcare.com/Patients-Visitors/Community-Health-Information-Resources.aspx>

Contained within this CHA is a detailed list of health indicators and a color coded table to help clarify if the data on display is positive or negative. This tool is static, but will be updated as new data is available or annually and can be found in Appendix F.

## d. 1. Demographic Information

Knowing the demographic makeup of a population is the foundation for making data-driven decisions about the health and well-being of a community. PD16 and the additional MWHC service areas consist of a broad variety of races, ethnicities, ages, gender identities, and spoken languages. These basic pieces of information allow helping organizations as well as policy makers to identify who may need additional support in a given area.

### 1.1 Total resident population

**Table:** Total resident population in PD16 and additional MWHC service areas

SN	Areas/Localities	Total resident population <sup>6</sup>
1	Caroline County	30,860
2	City of Fredericksburg	29,492
3	King George County	27,381
4	Spotsylvania County	138,449
5	Stafford County	156,748
<b>Total population in PD16</b>		<b>382,930</b>
6*	Orange County	37,695
7*	Prince William County	475,533
8	Westmoreland County	18,149
<b>Overall total population</b>		<b>914,307</b>

\*Note: MWHC only serves the Eastern portion of Orange County and the Southern portion of Prince William County. However, most indicators are only available at the locality level.

### 1.2 Population trend (1970-2020)

**Figure:** Population trend in PD16 from 1970 to 2020<sup>1</sup>

<sup>6</sup> United States Census Bureau, 2020.

**Figure:** Population trend in additional MWHC service areas from 1970 to 2020<sup>7</sup>

**1.3 Overall population change since 1970**

**Figure:** Overall population change since 1970 in PD16 and additional MWHC service areas<sup>2</sup>

<sup>7</sup> United States Census Bureau, 2020.

## 1.4 Population by age group

**Figure:** Percentage of population by age group in the State of Virginia, PD16, and additional MWHC service areas<sup>8</sup>

<sup>8</sup> United States Census Bureau, 2019.

## 1.5 Population by race

**Figure:** Percentage of population by race in the State of Virginia, PD16, and additional MWHC service areas<sup>9</sup>

<sup>9</sup> Community Health Information Resources (CHIR), 2021.

## 1.6 Population by ethnicity

**Figure:** Percentage of population by ethnicity in the State of Virginia, PD16, and additional MWHC service areas<sup>10</sup>

## 1.7 Population living in rural and urban areas

**Figure:** Percentage of population living in rural and urban areas in the State of Virginia, PD16, and additional MWHC service areas<sup>11</sup>

<sup>10</sup> Community Health Information Resources (CHIR), 2021.

<sup>11</sup> County Health Rankings, 2010.

## 1.8 Language spoken at home

**Figure:** Percentage of population speaking specific language at home in the State of Virginia, PD16, and additional MWHC service areas<sup>12</sup>

<sup>12</sup> United States Census Bureau, 2019.

## e. 2. Health Status

It is important to know what morbidities are contributing to the lifespan of the population. When looking at this data, it is helpful to ask questions about what data could be connected, both in cause and effect. The data found in this report is all secondary, and as time goes on, primary data will be collected to ensure that it is as accurate and meaningful as possible. Data on the neighborhood level is always more useful than data on a larger level. The correlation between age, race, socioeconomic status, and health status should be observed.

**Ask yourself, are the areas with higher rates of poverty disproportionately affected by chronic diseases? What other connections can you make?**

### 2.1 Infant mortality

**Figure:** Number of all infant deaths per 1,000 live births in the State of Virginia, PD16, and additional MWHC service areas<sup>13</sup>

<sup>13</sup> Virginia Department of Health, Division of Health Statistics, 2019.

2.2 Teen births by race/ethnicity

Figure: Number of births by race/ethnicity per 1,000 female population ages 15-19 in the State of Virginia, PD16, and additional MWHC service areas<sup>14</sup>

Rate per 1,000 female population age 15-19

<sup>14</sup> National Center for Health Statistics-Natality files, 2013-19.

2.3 Low birthweight by race/ethnicity

Figure: Percentage of live births with low birthweight (< 2,500 grams) by race/ethnicity in the State of Virginia, PD16, and additional MWHC service areas<sup>15</sup>

<sup>15</sup> National Center for Health Statistics- Natality files, 2013-19.

2.4 Life expectancy by race/ethnicity

This indicator represents the average number of years a person can expect to live.

Figure: Life expectancy by race/ethnicity in the State of Virginia, PD16, and additional MWHC service areas<sup>16</sup>

<sup>16</sup> National Center for Health Statistics, Mortality Files, 2017-19.

## 2.5 Mortality due to coronary heart diseases by race/ethnicity

**Figure:** Age-adjusted death rate per 100,000 population due to coronary heart diseases by race/ethnicity in the State of Virginia, PD16, and additional MWHC service areas<sup>17</sup>

<sup>17</sup> Centers for Disease Control and Prevention, National Vital Statistics System, 2015-19.

2.6 Mortality due to cancer by race/ethnicity

Figure: Age-adjusted death rate per 100,000 population due to cancer by race/ethnicity in the State of Virginia, PD16, and additional MWHC service areas<sup>18</sup>

<sup>18</sup> Centers for Disease Control and Prevention, National Vital Statistics System, 2015-19.

## 2.7 Mortality due to chronic lower respiratory diseases (asthma, emphysema, and all other chronic lower respiratory diseases) by race/ethnicity

**Figure:** Age-adjusted death rate per 100,000 population due to chronic lower respiratory diseases by race/ethnicity in the State of Virginia, PD16, and additional MWHC service areas<sup>19</sup>

<sup>19</sup> Centers for Disease Control and Prevention, National Vital Statistics System, 2015-19.

## 2.8 Mortality due to pneumonia

**Table:** Age-adjusted death rate per 100,000 population due to pneumonia in the State of Virginia, PD16, and additional MWHC service areas

SN	Areas/Localities	Age-adjusted mortality rate per 100,000 population due to pneumonia <sup>20</sup>
1	State of Virginia	12.9
2	Caroline County	13.5
3	City of Fredericksburg	14.4
4	King George County	13.3
5	Spotsylvania County	13.0
6	Stafford County	14.1
7	Orange County	16.6
8	Prince William County	11.5
9	Westmoreland County	21.2

## 2.9 Adult obesity and adults with asthma

**Table:** Percentage of adult obesity and adults with asthma in the State of Virginia, PD16, and additional MWHC service areas

SN	Areas/Localities	Adult obesity <sup>21</sup>	Adults with asthma <sup>22</sup>
1	State of Virginia	32%	8.8%
2	Caroline County	38%	9.5%
3	City of Fredericksburg	31%	9.5%
4	King George County	32%	8.9%
5	Spotsylvania County	35%	9.2%
6	Stafford County	31%	8.6%
7	Orange County	32%	9.3%
8	Prince William County	35%	8.8%
9	Westmoreland County	35%	9.7%

<sup>20</sup> National Institute on Minority Health and Health Disparities, 2014-18.

<sup>21</sup> Centers for Disease Control and Prevention, 2018.

<sup>22</sup> National Center for Chronic Disease Prevention and Health Promotion, 2019.

### 2.10 Mortality due to drug overdose (opioids)

**Figure:** Rate per 100,000 population of fatal opioid overdose in the State of Virginia, PD16, and additional MWHC service areas<sup>23</sup>

### 2.11 Poor mental health days

This indicator indicates age-adjusted average number of mentally unhealthy days reported in the past 30 days

**Table:** Poor mental health days reported in the past 30 days in the State of Virginia, PD16, and additional MWHC service areas

SN	Areas/Localities	Average number of poor mental health days reported in the past 30 days <sup>24</sup>
1	State of Virginia	4.0
2	Caroline County	4.4
3	City of Fredericksburg	4.6
4	King George County	4.2
5	Spotsylvania County	4.2
6	Stafford County	3.6
7	Orange County	4.4
8	Prince William County	3.9
9	Westmoreland County	4.6

<sup>23</sup> Virginia Department of Health, 2020.  
<sup>24</sup> Behavioral Risk Factor Surveillance System, 2018.

2.12 Suicides

This indicator represents the age-adjusted number of deaths due to suicide per 100,000 population.

**Figure:** Age-adjusted deaths due to suicides per 100,000 population in the State of Virginia, PD16, and additional MWHC service areas<sup>25</sup>

<sup>25</sup> National Center for Health Statistics, Mortality Files, 2015-19.

### f. 3. Health Behaviors

Health behaviors can be indicative of many other underlying issues. As an example, binge drinking has been tied to mental health issues, abusive situations, and increased motor vehicle accidents and deaths. It is important not to criticize those who have issues with substances, but to recognize these behaviors for what they are, a symptom of a bigger problem, and to offer as much care and support as possible. See Appendix C for an asset list for each locality in PD16, including substance abuse resources.

**What other factors can be associated with these health behaviors? What services are offered in the community to address them?**

#### 3.1 Adult smoking

**Figure:** Age-adjusted percentage of adults who are current smokers in the State of Virginia, PD16, and additional MWHC service areas <sup>26</sup>

<sup>26</sup> Behavioral Risk Factor Surveillance System, 2018.

### 3.2 Physical inactivity

**Figure:** Percentage of adults age 20 and over reporting no leisure-time physical activity in the State of Virginia, PD16, and additional MWHC service areas <sup>27</sup>

### 3.3 Binge drinking

**Table:** Age-adjusted percentage of adults reporting binge or heavy drinking in the State of Virginia, PD16, and additional MWHC service areas

SN	Areas/Localities	Age-adjusted percentage of adults reporting binge or heavy drinking <sup>28</sup>
1	State of Virginia	18%
2	Caroline County	18%
3	City of Fredericksburg	19%
4	King George County	20%
5	Spotsylvania County	19%
6	Stafford County	19%
7	Orange County	18%
8	Prince William County	17%
9	Westmoreland County	18%

<sup>27</sup> United States Diabetes Surveillance System, 2017.

<sup>28</sup> Behavioral Risk Factor Surveillance System, 2018.

## g. 4. Social Determinants of Health

Social determinants of health are simply factors that affect the health outcomes of a population. As communities learn more about the root causes of the inequities of the systems around us, they become more aware of the profound effects of the environment in which they live on their physical and mental health. Things like education access, drinking water quality, built environment, community engagement, and access to care are all examples of social determinants of health. By focusing on the social determinants of health, communities are able to progress toward public health 3.0, where organizations outside of the traditional healthcare system play a vital role in combating the public health issues that are happening in the community.

**What are some organizations outside of the traditional healthcare system that can play a part in addressing the social determinants of health in your community?**

### 4.1 Poverty

#### 4.1.1 Food environment index

Food environment index is an index of factors that contribute to a healthy food environment, from 0 (worst) to 10 (best). This measure includes access to healthy foods by considering the distance an individual lives from a grocery store or supermarket, locations for health food purchases in most communities, and the inability to access healthy food because of cost barriers.

**Table:** Food environment index in the State of Virginia, PD16, and additional MWHC service areas

Areas/Localities	Food environment index <sup>29</sup>	
Prince William County	9.4	
Stafford County	9.4	
Caroline County	9.0	
Spotsylvania County	9.0	
State of Virginia	8.8	
Westmoreland County	8.6	
Orange County	8.4	
City of Fredericksburg	8.3	
King George County	Missing data	

<sup>29</sup> USDA Food Environment Atlas, 2015 & 2018.

4.1.1 Population below 100% Federal Poverty Level (FPL) by race

Figure: Percentage of population below 100% Federal Poverty Level (FPL) in the State of Virginia, PD16, and additional MWHC service areas <sup>30</sup>

<sup>30</sup> United States Census Bureau, 2015-19.

## 4.2 Income and Employment

### 4.2.1 Top industries

**Table:** Top industries in the State of Virginia, PD16, and additional MWHC service areas

Areas/Localities	Top industries in the area/locality <sup>31</sup>
State of Virginia	<ol style="list-style-type: none"><li>1. Elementary and Secondary Schools</li><li>2. Construction</li><li>3. Restaurants and Food Services</li></ol>
Caroline County	<ol style="list-style-type: none"><li>1. Retail Trade</li><li>2. Health Care and Social Assistance</li><li>3. Public Administration</li></ol>
City of Fredericksburg	<ol style="list-style-type: none"><li>1. Educational Services</li><li>2. Health Care and Social Assistance</li><li>3. Retail Trade</li></ol>

<sup>31</sup> Data USA, 2019.

#### 4.2.2 Highest paying industries

**Table:** Highest paying industries in the State of Virginia, PD16, and additional MWHC service areas

Areas/Localities	Highest paying industries in the area/locality <sup>32</sup>
State of Virginia	<ol style="list-style-type: none"> <li>1. Computer and Peripheral Equipment Manufacturing</li> <li>2. Software Publishing</li> <li>3. Legal Services</li> </ol>
Caroline County	<ol style="list-style-type: none"> <li>1. Mining, Quarrying, and Oil &amp; Gas Extraction</li> <li>2. Agriculture, Forestry, Fishing &amp; Hunting, &amp; Mining</li> <li>3. Public Administration</li> </ol>
City of Fredericksburg	<ol style="list-style-type: none"> <li>1. Utilities</li> <li>2. Professional, Scientific, and Technical Services</li> <li>3. Public Administration</li> </ol>
King George County	<ol style="list-style-type: none"> <li>1. Public Administration</li> <li>2. Professional, Scientific, and Technical Services</li> <li>3. Professional, Scientific, &amp; Management, &amp; Administrative, &amp; Waste Management Services</li> </ol>
Spotsylvania County	<ol style="list-style-type: none"> <li>1. Public Administration</li> <li>2. Professional, Scientific, and Technical Services</li> <li>3. Utilities</li> </ol>
Stafford County	<ol style="list-style-type: none"> <li>1. Public Administration</li> <li>2. Professional, Scientific, and Technical Services</li> <li>3. Management Of Companies And Enterprises</li> </ol>
Orange County	<ol style="list-style-type: none"> <li>1. Utilities</li> <li>2. Public Administration</li> <li>3. Professional, Scientific, and Technical Services</li> </ol>
Prince William County	<ol style="list-style-type: none"> <li>1. Administration</li> <li>2. Professional, Scientific, and Technical Services</li> <li>3. Utilities</li> </ol>
Westmoreland County	<ol style="list-style-type: none"> <li>1. Real Estate &amp; Rental &amp; Leasing</li> <li>2. Professional, Scientific, and Technical Services</li> <li>3. Professional, Scientific, &amp; Management, &amp; Administrative &amp; Waste Management Services</li> </ol>

<sup>32</sup> Data USA, 2019.

4.2.3 Median annual household income

**Figure:** Median annual household income of the residents in the State of Virginia, PD16, and additional MWHC service areas <sup>33</sup>

<sup>33</sup> United States Census Bureau, 2019.

4.2.4 Median annual household income by race/ethnicity

Figure: Median annual household income of the residents by race/ethnicity in the State of Virginia, PD16, and additional MWHC service areas <sup>34</sup>

<sup>34</sup> United States Census Bureau, American Community Survey, 2015-19.

4.2.5 Income inequality (Gini index)

Gini index values range between zero and one. A value of one indicates perfect inequality where only one household has any income. A value of zero indicates perfect equality, where all households have equal income.

**Table:** Income inequality (Gini index) in the State of Virginia, PD16, and additional MWHC service areas

Areas/Localities	Income inequality (Gini index) <sup>35</sup>	
Westmoreland County	0.48	High income inequality 
State of Virginia	0.47	
City of Fredericksburg	0.46	
Caroline County	0.41	
Prince William County	0.39	
Spotsylvania County	0.39	
Orange County	0.38	
King George County	0.37	Low income inequality
Stafford County	0.37	

4.2.6 Unemployment rate

This indicator represents the percentage of population ages 16 and older who are unemployed but seeking work.

**Figure:** Percentage of unemployed population in the State of Virginia, PD16, and additional MWHC service areas<sup>36</sup>

<sup>35</sup> American Community Survey, 2015-19.

<sup>36</sup> Bureau of Labor Statistics, 2019.

4.2.7 Cost of living index

The cost of living indices are based on a US average of 100. An amount below 100 means the place is cheaper to live in than the US average. A cost of living index above 100 means the place is more expensive to live in than the US average.

**Table:** Cost of living index in the US, State of Virginia, PD16, and additional MWHC service areas

Areas/Localities	Cost of living index <sup>37</sup>	
Prince William County	167.4	Higher cost of living than the US average
City of Fredericksburg	166.2	
Spotsylvania County	164.3	
Stafford County	164.2	
King George County	132.9	
State of Virginia	103.7	
United States	100	Lower cost of living than the US average
Westmoreland County	86.7	
Caroline County	86.6	
Orange County	86.5	

<sup>37</sup> City Data, 2019.

4.3 Housing  
4.3.1 Eviction rate

An “eviction rate” is the homes that received an eviction judgment in which renters were ordered to leave.

**Figure:** Eviction rate in the United States, State of Virginia, PD16, and additional MWHC service areas<sup>38</sup>

<sup>38</sup> Eviction Lab, 2016.

4.3.2 Eviction filing rate by neighborhood

The eviction filing rate is the ratio of the number of evictions filed in an area over the number of renter-occupied homes in that area. Rates by race/ethnicity are calculated by aggregating data on evictions in census block groups with a majority of the population (over 50%) belonging to a specific race/ethnicity.

Figure: Eviction filing rate in the United States, State of Virginia, PD16, and additional MWHC service areas<sup>39</sup>

<sup>39</sup> Eviction Lab, 2016.

### 4.3.3 Substandard housing quality

This indicator reports the percentage of owner- and renter-occupied housing units having at least one of the following conditions: **1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with 1 or more occupants per room, 4) selected monthly owner costs as a percentage of household income greater than 30%, and 5) gross rent as a percentage of household income greater than 30%.**

**Figure:** Substandard housing quality rate in the State of Virginia, PD16, and additional MWHC service areas<sup>40</sup>

### 4.3.4 Housing stock (age)

This indicator reports, for a given geographic area, the median year in which all housing units (vacant and occupied) were first constructed.

**Table:** Median year of construction of all houses in the State of Virginia, PD16, and additional MWHC service areas

Areas/Localities	Median year of construction of all houses <sup>41</sup>
State of Virginia	1982
Caroline County	1988
City of Fredericksburg	1979
King George County	1996
Spotsylvania County	1995
Stafford County	1995
Orange County	1990
Prince William County	1992
Westmoreland County	1981

<sup>40</sup> American Community Survey, 2015-19.

<sup>41</sup> American Community Survey, 2015-19.

4.3.5 Home ownership

Figure: Home ownership in the State of Virginia, PD16, and additional MWHC service areas<sup>41</sup>

4.3.6 Housing cost burden (30% or more)

This indicator reports the percentage of the households where housing costs are 30% or more of total household income.

Figure: Housing cost burden (30% or more) in the State of Virginia, PD16 areas, and additional MWHC service areas<sup>42</sup>

<sup>41</sup> American Community Survey, 2015-19.

<sup>42</sup> American Community Survey, 2015-19.

4.4 Education

4.4.1 Number of public schools per 100,000 residents

Figure: Number of public schools per 100,000 population in PD16 and additional MWHC service areas<sup>44</sup>

4.4.2 Student to teacher ratio in public schools

Figure: Student to teacher ratio in public schools in the State of Virginia, PD16, and additional MWHC service areas<sup>45</sup>

<sup>44</sup> National Center for Education Statistics, 2019-20.

<sup>45</sup> National Center for Education Statistics, 2019-20.

4.4.3 Percentage of population (age 25+) with no high school diploma

**Figure:** Percentage of population (age 25+) with no high school diploma in the State of Virginia, PD16, and additional MWHC service areas<sup>46</sup>

<sup>46</sup> American Community Survey, 2015-19.

## 4.5 Access to care

### 4.5.1 Primary care physicians

This indicator represents the ratio of population to primary care physicians in a given geographic area.

**Table:** Ratio of population to primary care physicians in the State of Virginia, PD16, and additional MWHC service areas

Areas/Localities	Ratio of population to primary care physicians <sup>47</sup>
State of Virginia	1,330:1
Caroline County	6,150:1
City of Fredericksburg	730:1
King George County	4,430:1
Spotsylvania County	1,660:1
Stafford County	3,260:1
Orange County	2,290:1
Prince William County	2,230:1
Westmoreland County	5,940:1

### 4.5.2 Mental health providers

This indicator represents the ratio of population to mental health providers in a geographic area.

**Table:** Ratio of population to mental health providers in the State of Virginia, PD16, and additional MWHC service areas

Areas/Localities	Ratio of population to mental health providers <sup>48</sup>
State of Virginia	530:1
Caroline County	3,070:1
City of Fredericksburg	140:1
King George County	2,440:1
Spotsylvania County	1,140:1
Stafford County	1,220:1
Orange County	1,850:1
Prince William County	800:1
Westmoreland County	9,010:1

<sup>47</sup> American Medical Association, 2018.

<sup>48</sup> Centers for Medicare and Medicaid Services, National Provider Identification, 2020.

4.5.3 Dentists

This represent the ratio of population to dentists in a given geographic area.

**Table:** Ratio of population to dentists in the State of Virginia, PD16, and additional MWHC service areas

Areas/Localities	Ratio of population to mental health providers <sup>48</sup>
State of Virginia	1,410:1
Caroline County	4,390:1
City of Fredericksburg	490:1
King George County	2,060:1
Spotsylvania County	2,430:1
Stafford County	2,940:1
Orange County	3,710:1
Prince William County	1,750:1
Westmoreland County	9,010:1

<sup>49</sup> Area Health Resource File, 2019.

#### 4.5.4 Uninsured adults

This indicator represents the percentage of adults under age 65 without health insurance.

**Figure:** Percentage of uninsured adults in the State of Virginia, PD16, and additional MWHC service areas<sup>50</sup>

#### 4.5.5 Household with no motor vehicle

This indicator reports the percentage of households with no motor vehicle based on the latest 5-year American Community Survey estimates.

**Figure:** Percentage of household with no motor vehicle in the State of Virginia, PD16, and additional MWHC service areas<sup>51</sup>

<sup>50</sup> Small Area Health Insurance Estimates, 2018.

<sup>51</sup> United States Census Bureau, 2015-19.

4.6 Other social factors

4.6.1 Social vulnerability index

The degree to which a community exhibits certain social conditions, including high poverty, low percentage of vehicle access, or crowded households, may affect that community’s ability to prevent human suffering and financial loss in the event of disaster. These factors describe a community’s social vulnerability. The social vulnerability index is a measure of the degree of social vulnerability in counties and neighborhoods across the United States, where a higher score indicates higher vulnerability.<sup>52</sup>

**Table:** Social vulnerability index in the State of Virginia, PD16, and additional MWHC service areas

Areas/Localities	Social vulnerability index <sup>53</sup>	
City of Fredericksburg	0.56	High vulnerability 
Orange County	0.47	
Caroline County	0.35	
State of Virginia	0.34	
Prince William County	0.30	
Westmoreland County	0.29	
Spotsylvania County	0.22	
Stafford County	0.15	Low vulnerability
King George County	0.02	

4.6.2 Grocery stores per 100,000 population

**Figure:** Number of grocery stores per 100,000 population in the State of Virginia, PD16 and additional MWHC service areas <sup>54</sup>

<sup>52</sup> National Center for Health Statistics, 2018.  
<sup>53</sup> National Center for Health Statistics, 2018.  
<sup>54</sup> United States Census Bureau, County Business Patterns, 2019.

4.6.3 Disconnected youths

This indicator represents the percentage of teens and young adults ages 16-19 who are neither working nor in school.

Figure: Percentage of disconnected youths in the State of Virginia, PD16 and additional MWHC service areas <sup>55,56</sup>

4.6.4 Access to recreation and fitness facilities

Table: Number of recreation and fitness facilities per 100,000 population in the State of Virginia, PD16, and additional MWHC service areas

Areas/Localities	Rate per 100,000 population <sup>57</sup>
State of Virginia	13.75
Caroline County	Less than 3
City of Fredericksburg	16.5
King George County	16.9
Spotsylvania County	8.9
Stafford County	12.4
Orange County	Less than 3
Prince William County	16.2
Westmoreland County	Less than 3

4.6.5 Access to exercise opportunities

**Figure:** Percentage of population with adequate access to locations for physical activity in the State of Virginia, PD16, and additional MWHC service areas <sup>58</sup>

4.6.6 Broadband access

**Figure:** Percentage of households with broadband internet connection in the State of Virginia, PD16, and additional MWHC service areas <sup>59</sup>

<sup>58</sup> County Health Rankings and Roadmaps, 2021.

<sup>59</sup> American Community Survey, 2015-19.

4.6.7 Drinking water violations

**Table:** Presence of health-related drinking water violations in PD16 and additional MWHC service areas

Areas/Localities	"Yes" indicates the presence of a violation, "No" indicates no violations <sup>60</sup>
Caroline County	No
City of Fredericksburg	Missing data
King George County	Yes
Spotsylvania County	No
Stafford County	No
Orange County	No
Prince William County	Yes
Westmoreland County	No

<sup>60</sup> Safe Drinking Water Information System, 2019.

# Appendix A:

## Evaluation of Impact from Previous CHNA

Mary Washington Healthcare, in compliance with the Internal Revenue Service regulations related to section 501(r) of the Affordable Care Act, created the following document to provide an update on how it will use the findings of the Rappahannock Region Health Needs Assessment to ensure it is meeting the needs of the communities it serves.

### Community Health Needs Assessment Summary

The 2019 CHNA conducted for Mary Washington Healthcare (MWHC) in partnership with Be Well Rappahannock (BWR) used a comprehensive set of quantitative and qualitative data to determine the top health needs in the Rappahannock Region. The findings in the report were used to determine the best strategies to improve the health of the region through the development of new programs, enhancement of existing programs, and development of new partnerships. The prioritization process identified three top health needs: Access to Health Services and Preventative Care; Behavioral Health and Behavioral Issues; and Exercise, Nutrition and Weight. MWHC will outline how it plans to address the health needs of the community in its Implementation Strategy and BWR will consider the findings as it continues to develop its strategic plan.

### Qualitative data collection

The qualitative data used in this assessment consists of key informant surveys conducted via a 14-question online survey administered through Survey Monkey, an online survey tool. The survey information was gathered through a combination of check box, free text, and ranking questions. Additionally, qualitative data was captured during group discussions held during the prioritization session and provided further insight into prioritized health needs.

### Quantitative primary research

The main source for the secondary data, or data that has been previously collected is the Community Health Information Resource (CHIR), a publicly available data platform that is maintained by MWHC and Healthy Communities Institute (HCI). Data on the CHIR tool is retrieved from a variety of state and national sources, including the American Community Survey, Robert Woods Johnsons County Health Rankings and the Virginia Department of Health.

### Prioritization Process and Findings

In order to better target community issues with regards to the most pressing health needs, 20 community experts, including members of Be Well Rappahannock were invited to participate in a prioritization session hosted by HCI. Nine community experts participated in the session, which focused on 11 significant health needs. The significant health needs, including the three prioritized health needs, were used for the development of MWHC’s implementation plan that address some of the community’s most pressing health needs.

Health Need	
1. Access to Health Services and Preventative Care	6. Diabetes
2. Transportationg	7. Heart Disease and Stroke
3. Behavioral Health	8. Sexual Health
4. Substance Abuse	9. Cancer
5. Exercise, Nutrition and Weight	10. Public Safety

### Top 3 Health Priorities

After the first round of voting, the top five health needs were included in what was referred to as “rapid fire discussions” to come up with the ultimate three prioritized health needs. The results of the second round of voting yielded the top three prioritized health needs that were identified from the session.

Health Need
1. Access to Health Services and Preventative Care
2. Behavioral Health
3. Exercise, Nutrition and Weight
4. Substance Abuse
5. Transportation

### Addressing the Top Three Health Needs

Mary Washington Hospital and Stafford Hospital organized its implementation strategy around Mary Washington Healthcare’s core Community Benefit objectives established for years 2019-2022. Utilizing the resources of Mary Washington Hospital and Mary Washington Healthcare’s Centers of Excellence, all Top Three Health Needs will be addressed during the three-year period. The Mary Washington Hospital Implementation Strategy will target persons living in the City of Fredericksburg and the counties of southern Stafford, Spotsylvania, Caroline, King George, Westmoreland, and eastern Orange. Not all Community Benefit Programs listed in the implementation strategy will be held on the campus of Mary Washington Hospital. Promotion of activities and data collection will reflect the targeted communities described above and may result in the development of new sites based upon interest and need.

Internal and external strategies (See Note) along with related anticipated outcomes, identified community partnerships, and specific programs/activities for each Community Benefit outcome describe how the health needs are being addressed. The utilization of the Community Health Information Resource (CHIR) tool is encouraged to provide the ability to benchmark those specific diseases and conditions where a measurement or comparison is available to objectively evaluate the effectiveness of these strategies.

The implementation strategy is reviewed by the Mary Washington Healthcare Board of Trustees. Findings from formal evaluations of each Community Benefit program and continuous engagement of community stakeholders influence modifications to the implementation strategy. The implementation strategy is approved annually by the Mary Washington Healthcare’s Board of Trustees.

**Note:** Mary Washington Healthcare considers efforts to support its patients and Associates part of its commitment to the community. Therefore, while programs/activities that are open to the broader community (external strategies) are only reportable to the Internal Revenue Service, Mary Washington Healthcare includes internal strategies targeting only its patients and Associates in addition to reportable external strategies.

### **Mary Washington Healthcare Community Benefit Objectives**

Objectives were created to specifically address health needs identified in the Rappahannock Region Community Health Needs Assessment.

1. Facilitate **access to preventative health-related** services for uninsured/underinsured, while supporting a stronger community referral process and creating **population health** programs.
  1. MWHC supports programs that are continuing to expand our understanding of the many different social, economic and environmental factors which shape our communities health, and empowering communities nationwide with the data, knowledge and tools they need to enable everyone to live the healthiest life possible. MWHC will work to help identify and address the root causes of our communities' health disparities.
  2. MWHC will focus on eliminating racial/ ethnic health disparities in maternal-fetal health for our PD 16 residents
2. Improve access to **behavioral health and behavioral disorders**, both directly and in providing support for community initiatives.
  1. Inform seniors and their caregivers of relevant issues including understanding of mental changes associated with aging, end-of-life decisions, and community resources.
  2. Support the initiatives of community outreach programs that address behavioral health in youth and young adults.
3. Increase focus on exercise, nutrition, and weight for improving and maintaining health.
  1. Increase diabetes education and screening opportunities targeting both pre- diabetes/diabetes populations with a focus on programming that addresses nutrition and obesity from birth through adulthood.
  2. Increase healthy food options to targeted PD 16 food deserts.
  3. Strengthen existing community partnerships to increase access to exercise programs and facilities in PD 16.

### **Community Benefit Objective 1: Facilitate access to health-related services for uninsured/underinsured, while supporting a stronger community referral process and population management.**

#### **Top Health Need:**

Objective 1 will specifically explore ways to improve access to primary care providers in the Mary Washington Hospital community as well as develop processes to improve the coordination of care for uninsured and/or underinsured patients.

#### **Internal Strategies:**

1. Explore opportunities to partner with local primary care physicians and safety net providers to establish referral patterns for all unassigned patients being discharged from the emergency and inpatient departments at Mary Washington Hospital.
2. Provide community resources information to all identified, uninsured/underinsured MWHC patients.
3. Work with internal departments to collect Social Determinants of Health data (including language Race, Ethnicity).

### **External Strategies:**

1. Collaborate with various community service groups and safety-net providers to streamline enrolment processes for financial assistance programs taking into consideration current criteria for various social service programs
2. Host information sessions for community groups and advocates to raise awareness of MWHC's Patient Financial Assistance Programs (PFAP).
3. Raise awareness of community resources, including education related to insurance access
4. Partner with community stakeholders to create initiatives that address the Social Determinants of Health (SDoH) to the health outcomes and reduce readmission rates.

### **Anticipated Primary Outcomes:**

- Improve health status of patients by establishing medical homes resulting in reduced readmission rates for patients seeking primary care follow-up in emergency departments.
- Better understanding of community health-related services in the community and appropriate use of medical services
- Increased participation in Medicaid/Medicare Expansion products, MWHC's Patient Financial Assistance Programs as compared to last year.
- Increased coordination of care for uninsured/underinsured patients navigating various free or reduced-fee community services.
- Increase transition care plans for all eligible patients.

### **Community Benefit Tactic(s) 2019-2022**

1. Develop a partnership between MWHC, key safety-net providers, willing community physicians, and other community partners that will encourage a coordinated continuum of care for uninsured/underinsured.
2. Collaborate with The MWHC Alliance to create an intentional plan to address transitional care plans for our patients and the community.

### **Outcomes to Date**

**Note:** The COVID-19 pandemic has had a major impact on the capacity of health systems to continue the delivery of essential health services. In order to prioritize the safety of patients, staff and the community, the ability to address all the needs identified by the last CHNA has been delayed. Mary Washington Healthcare will continue to reassess and focus on its commitment to improve the health of our community.

- Mary Washington Healthcare is committed to ensuring those who come to us for care will not experience financial hardships when seeking high quality medical care. We have taken several steps to help more people qualify for financial discounts. Those with income levels 200% to 500% of the federal poverty level will not be asked to pay more than 5% of annual household income for services provided by Mary Washington Healthcare.
- MWHC leadership hosted several learning sessions for community safety net agencies and organizations to raise awareness of MWHC's Patient Financial Assistance Programs (PFAP). Fifty agency representatives attended.
- Awareness of resources has been increased by signage and handouts that were posted throughout the health system at patient points of entry as well as on MyChart patient portal. Patient information and financial assistance applications were offered at patient registration. Designated staff were available to field financial questions, and we increased financial support resources in our Emergency Departments.

- Continued support of safety net provides including two free clinics, a community health center and a safety net provider that provides care on a sliding scale basis.
- Support for the expansion of Medicaid and creation of Medicare of Medicare Advantage plan.
- Support of community-based organizations that address the Social Determinants of Health by providing grants and mini-grants.

MWHC has expanded its reach and breadth of services in the last three years. Mary Washington Medical Group has more than doubled the number of medical practices and providers, representing several service lines and specialties. To date, MWHC has 46 practices covering 24 specialties with over 225 providers. The expansion also includes the addition of two urgent care facilities. This growth not only represents expansion of services, but it also demonstrates the physical expansion and growth of access to all our service areas. As our primary and secondary service area population continue to grow, it is critical that access points expand with that growth.

## **Community Benefit Objective 2: Improve access to behavioral health services, both directly as well as in providing support for community initiatives.**

### **Top Health Need:**

Mental health and mental disorders will be addressed in Objective 2. Resources at Mary Washington Hospital and Snowden at Fredericksburg will play a critical role in addressing this objective.

### **Internal Strategies:**

1. Increase capacity and services provided to promote access at Snowden of Fredericksburg to reduce referrals to other facilities due to the lack of beds or specialty services.
2. Continued mental health assessment and physician-requested consultations for disposition with referrals for appropriate services
3. Provide expertise and awareness about mental health and mental disorders as they address specific community mental health concerns.

### **External Strategies:**

1. Continue community-based collaborations with such organizations as the Rappahannock Area Community Services Board, regional utilization management teams, and Mental Health of America and to improve coordination of care and increase access to behavioral health services
2. Continue to provide free mental health assessments and screenings to individuals in the community with appropriate referrals to services offered in the community.
3. Continued grant support for 24-hour Crisis Hotline with professional therapists to address immediate, behavioral health needs of community, including referrals to appropriate programs.
4. Continue to partner with Be Well Rappahannock to continue the Opioid crisis taskforce and continue to align with the initiatives.
5. Support the development of a strong mental health workforce with trainings and internships.

### **Anticipated Primary Outcomes:**

- Community members will have increased knowledge and awareness of key mental health signs and symptoms as well as a better understanding of services available.
- To have a more resilient community that can support one another through mental health trauma and substance abuse.

## Outcomes to Date

### Mental Health

- Despite the tremendous burden placed on MWHC during the pandemic, the health system proceeded with plans to expand space and patient volume at Snowden at Fredericksburg, the inpatient behavioral health unit, located on the MWH campus. Understanding the need for behavior health and wellness resources was greater than ever, SAF opened the new unit in August 2020, expanding capacity by 20 patients. The new addition provides behavioral inpatient beds, bring total capacity to 74.

### Opioid Workgroup Summary

- Hosting and facilitating several Hidden in Plain Sight (HiPS) presentations in partnership with the Rappahannock Area Community Services Board(RACSB). HiPS is a curriculum of sorts that allow parents of school-aged children to walk through a mock bedroom of a teenager. Items throughout the room appear harmless to the naked eye but facilitators point out how these everyday items can be used to hide, use, and store harmful substances. 1582 attendees participated in one of 12 in-person or virtual events.
- MWHC implemented was to provide drug disposal kits in the Emergency Department at Mary Washington Hospital. Patients who were leaving the Emergency Department with a prescription for opiates, often for managing pain, were encouraged to take a disposal kit, should the patient not need all the pills prescribed.
- MWHC hosted Operation Medicine Cabinet drop-off sites at Mary Washington Hospital and Stafford Hospital two times every year as part of a collaborative with Partners on Aging. 17 events held in 2020 and 2021; over 4500 pounds of medicine were discarded.

### **Community Benefit Objective 3: Exercise, Nutrition, and Weight. Increase diabetes education and screening opportunities targeting both pre-diabetes/diabetes population with a focus on programming that addresses nutrition and obesity from birth through adulthood.**

Objective 3 will work towards reducing the prevalence of diabetes and obesity through its strategies and programs. Resources from MWHC's Diabetes Management Program will be critical in implementing the following strategies.

#### Internal Strategies:

1. Provide referrals to Community Benefit programs that address diabetes and obesity prevention to/management to adult patients.
2. Promotion of Health & Wellness initiatives related to nutrition and fitness for MWHC Associates

#### External Strategies:

1. Conduct diabetes-related health screenings in the community
2. Provide diabetes and obesity related support
3. Raise awareness and provide access to healthy food seminars, classes and town halls
4. Advocate for area-wide "health living" campaign
5. Supply educational training related to nutrition counseling for the community
6. Provide community-wide blood pressure screens

### Anticipated Primary Outcomes:

- Improved understanding of nutritional needs to reduce on-set of diabetes, as measured by pre- and post-test analysis with Community Benefit program participants.
- Increased knowledge of new and healthy foods to low-income youths and their families using access to free fruits and vegetables, recipe/cooking tips and social media reminders.
- Improved self-efficacy of diabetes management, as measured by pre/post-test analysis.

### Community Benefit Tactics 2019-2022:

1. Continue to host “Kids for a Cure Diabetes” Summer Camp in order to promote healthy management of diabetes and provide educational resources to help children manage their health. (MWHC Diabetes Management Program and Diabetes and Obesity work group)
2. Participate in the “Balanced Living with Diabetes” program
3. Work with the area YMCA to enroll eligible patients into the YMCA LEAN and Exercise program

### Outcomes to Date:

#### Diabetes Management

- 602 persons attended diabetes support forums were conducted monthly and offered, free for anyone in the community. An array of topics related to physical activity, nutrition, medication and stress management were covered.
- 2 blog posts were developed educating the community on knowing their risk for diabetes and awareness of top 15 spring inspired “health snacks”.
- 4 Podcasts were offered with topics that focused on Diabetes Myths and Misunderstandings, Navigating the Holidays, All About Diabetes and Apps for Diabetes Management.
- 55-60 children attended “Kids for a Cure Diabetes” weeklong summer camps. Children engaged in fun activities that focused on promoting healthy management of diabetes and provides educational resources to help children manage their health.

MWHC has partnered with community-based organizations to strengthen the linkages between traditional healthcare and community-based prevention strategies in order to help individuals prevent, delay, reduce or live better with chronic conditions. Healthcare referrals to evidenced based interventions, such as the YMCA's Diabetes Prevention Program and Lifestyle Essentials for Exercise and Nutrition, blood pressure management and support groups (eg. smoking cessation, Heart to Heart) have been proven to be beneficial and will continue to be an area of focus. Programs concentrate on providing participants with education, strategies, tools, and support to promote healthy living and chronic disease prevention.

### Program Enrollments: 2019-2021 (All programs were paused in March 2020, enrollment delivery methods changed to virtual only in April 2020-December 2021)

- **YMCA's Diabetes Prevention Program** (Duration: 1 year):
  - Participants: 95
  - Average Physical Activity minutes: 137 (weekly)
  - Change in body percentage: 4%

- **Lifestyle Essentials for Exercise & Nutrition** (Duration: 12 weeks):
  - Participants: 28 (program launched January 2020)
  - Change in body percentage: 7%
  - Participants who self-reported improvement in quality of life: 75%
- **Blood Pressure Self-Monitoring Program** (Duration: 4 months):
  - Participants: 49
  - % Average Started Uncontrolled: 43%
  - % Achieved Controlled Blood Pressure: 86%
  - Average Decrease in SBP: 12.72mmHg

## MWHC & YMCA Community Health Fairs

Since 2018, MWHC and the local YMCA have collaborated to provide health fairs for our community. Our health fairs focused on providing resource information about good health and preventative medicine, screenings and assessments - blood pressure, mental, physical and cardiovascular health - that could detect a problem and get attendees on a track to a healthier self. MWHC has been actively involved in health fairs throughout our service area to share resources and work to improve the health of the communities we serve.

- **2019**
  - **MWHC/YMCA Community Health Fair:**
    - Delivery Method: In-person
    - 600+ combined event attendees
    - Services provided included:
      - 90+ community vendors
      - Hearing & vision testing
      - Flu shots
      - Glucose screening
      - Balance testing
      - BP screenings
      - Wellness & fitness assessments
      - Physical activity demonstrations
      - Education and connections to many chronic disease community-based prevention, management and wellness programs
- **2020**
  - **MWHC/YMCA Community Health Fair:**
    - Delivery Method: Hybrid, Virtual & In-person events (divided over 4 YMCA branches)
    - Virtual Health Fair Data:
      - Top videos viewed: Pelvic Health, Things to Know About Hypertension, Cancer Care & Mental Health Resilience: 1,300+ minutes Facebook views as of 11/13/20
      - 86 link clicks (Zoom, YouTube health video links)
    - 200+ YMCA in-person fair attendees that participated in the following:(limited due to COVID-19 restrictions):
      - Physical activity demonstrations
      - Glucose Testing
      - BP screening
      - Diabetes Awareness Walk
      - Physical fitness assessments and more

---

- **2021**

- **MWHC/YMCA Community Health Fair:**

- 215 YMCA in-person fair attendees that participated in blood pressure and injury prevention screenings, glucose testing, flu shots and fitness demos (fairs were divided between locations and were limited due to COVID-19 restrictions)
    - Delivery Method: Virtual & In-person
    - Virtual Health Fair Data (collected from November 9th-27th):
      - 300 website views
      - 52 assessment link clicks
      - 62 live seminar attendees (topics discussed were mental health, hypertension and diabetes awareness)
- 

## **Addendum**

### **MWHC Response to COVID-19**

Like so many health systems across the country, MWHC had to pivot and navigate quickly to address the new norms that COVID-19 brought to bear. At the beginning of the pandemic, with so much unknown, MWHC made difficult decisions, always prioritizing the safety of patients, staff, and the community. Whether curtailing scheduled surgeries, limiting visitation and implementing mask mandates, MWHC leadership always erred on the side of safety and health.

As the pandemic evolved, MWHC maintained a physical and virtual presence to keep the community educated and informed. Leadership recognized MWHC's unique position as the subject matter expert in the community and began hosting virtual town halls. Information presented would include current COVID numbers for our region and strategies being implemented. Opportunities for live questions and answers were available for attendees. The town halls were aired live on Facebook, recorded and posted on MWHC's YouTube channel so anyone could watch at their convenience. The number of persons viewing the sessions increased and included over 200,000 thousand views. This free service became the local source of accurate and the most current information about COVID-19. The town halls are still ongoing as needed by updates and changes, particularly with the multiple surges stemming from the different variants of the virus.

Ask the Experts Facebook Live events and podcasts have been another outreach method used to provide the community real-time information and resources on a variety of health concerns thanks to our associates, medical providers, and leaders.

One innovation that was a direct result of the pandemic was the creation of telemedicine opportunities for some of our providers. This allowed individuals to safely access their providers from the comfort of their homes. Though this was a response to the pandemic, the result is this new access opportunity continues to be an option for many in our community. The providers are happy and so are the patients. This effort ultimately expands access to our services for many in our service areas.

Another innovation in response to COVID-19 was the creation of a field hospital. The lower level of the associate parking garage was converted to a field hospital to triage patients, should the Mary Washington Hospital Emergency Department be overwhelmed with virus patients. Ironically, at the beginning of COVID-19, the field hospital was never needed. In fact, before the vaccine clinic opened at the Fick Center, the field hospital was used as a vaccine clinic for our associates. However, as the field hospital remained on site, the health system was in an optimum position when the Omicron variant hit the region. As hospitals and emergency departments were overrun with the highest COVID-19 patient volumes ever in late 2021, the field hospital became operational to serve as an infusion clinic and treating the mild to moderate COVID-19 patients and lessen the impact on the Emergency Department.

Once testing for COVID-19 was approved, MWHC quickly partnered with the Rappahannock Area Health District (RAHD) to provide safe and secure drive-thru testing sites were set up across the region to insure everyone had access to a site. Testing sites were set up in neighborhoods, church/school parking lots as well as at some of MWHC lab locations. MWHC provided some of the supplies, all the testers and several other associates to supplement the staffing needs. The MWHC medical groups were critical to the staffing of the testing sites.

One of the most dramatic impacts MWHC had on our community during the pandemic was our response once the vaccines were available. Once there was mass production and availability of the vaccines

MWHC quickly set up the COVID-19 vaccine clinic. Until that point, RAHD was attempting to manage the storage, distribution, and delivery of the vaccines to the most vulnerable in the community, those 75 year of age or older. Though the health department was doing the best they could with the resources they had, they turned to MWHC's Community Programs Office to seek help. Several MWHC corporate departments jumped in to help immediately, including Marketing &

Communications, Centralized Scheduling and Health Link. MWHC even created a help line to assist those individuals who either did not have internet access to schedule their own appointment or just wanted to speak to a human to help them navigate the system. Because of these efforts, the backlog of those 75 and older awaiting a vaccine appointment quickly disappeared.

Because of the tireless work, innovative thinking and carefully planned logistics, the vaccine clinic at the Fick Center opened in January 2021 and remained operational through September 2021. Even after the clinic opened its doors, the clinic coordination team continuously tweaked and improved operations based on observations and feedback from the public and associates. The flow was seamless. Many of our citizens who came to us for a vaccine often compared the clinic operations to Chik-Fil-A with the kindness and friendliness of our staff to the smooth and efficient process. Associates from several departments across the health system jumped in to help. Clinical staff were on hand to fill vials and administer the vaccine, while associates from all over the health system assisted with check-in, check-out, traffic control and patient escort.

A significant effort was made on reducing the disparities between some ethnic groups relative to vaccines. Emphasis was put into partnering with community resources to be culturally sensitive and aware in identifying, educating, recruiting and vaccinating underrepresented and underserved persons in our community. MWHC enlisted many nontraditional partners in our community to achieve this, including churches, fraternities, sororities, civic organizations, minority-owned organizations, and key influencers. Over 7,500 African Americans were vaccinated through this initiative within our vaccination's clinic. As a result, the percentage of the persons vaccinated who were African American became more closely aligned with the representative share of African Americans of the total population.

For several weeks, the vaccine clinic often operated from 7:30am – 8:00pm, Monday – Saturday, occasionally 7 days a week. This allowed the greatest number of residents to access the clinic and receive the vaccine. Over the nine months of operations, the MWHC Vaccine Clinic administered over 200,000 vaccine doses. The daily average for the clinic was 2,000.

## Appendix B: Community Partners and CHA Group Participants

### Core Group:

- Allison Balmes-John, Population Health Coordinator, Rappahannock Area Health District
- Phil Brown, Director of Corporate Strategy, Mary Washington Healthcare
- Madison Eberhart, Public Information Specialist, Rappahannock Area Health District
- Susie Hammock, Accreditation and Quality Improvement Coordinator, Rappahannock Area Health District
- Naomie Murdock, Manager of Community Programs, Mary Washington Healthcare
- Dr. Olugbenga Obasanjo, Health Director, Rappahannock Area Health District
- Xavier Richardson, Senior Vice President and Chief Corporate Development Officer, Mary Washington Healthcare; President of Mary Washington Hospital and Stafford Hospital Foundations
- Ashish Shrestha, Population Health Data Analyst, Rappahannock Area Health District

### Steering Committee:

- Central Virginia Housing Coalition
- Community Foundation of the Rappahannock River Region
- Disability Resource Center/Center for Independent Living
- Fredericksburg City Public Schools
- Fredericksburg Regional Food Bank
- Healthy Generations Area Agency on Aging
- Geico
- George Washington Regional Commission
- Germanna Community College
- Local Pediatrician
- Mary Washington Healthcare
- Rappahannock Area Community Services Board
- Rappahannock Area Health District
- Rappahannock EMS Council
- Rappahannock United Way
- Smart Beginnings Rappahannock Area
- Stafford County Government

### Caroline County Workgroup:

- Caroline's Promise
- Caroline County Department of Social Services
- Caroline County Fire and Rescue
- Caroline County- County Administrator's Office
- Caroline County Habitat for Humanity
- Caroline County NAACP
- Caroline County Parks and Recreation
- Caroline County Public Schools
- Central Virginia Health Services
- Rappahannock Area YMCA Legal Aid Works
- Virginia Cooperative Extension

### Fredericksburg Work Group:

- City of Fredericksburg City Manager's Office
- Central Virginia Health Services
- Fredericksburg Area Health and Support Services (FAHASS)
- Fredericksburg Department of Social Services

- Fredericksburg Fire Department
- Fredericksburg NAACP
- Fredericksburg Parks, Recreation, and Events
- Fredericksburg Regional Chamber of Commerce
- Habitat for Humanity of Fredericksburg
- Hazel Hill Healthcare Project
- Lois Ann's Hope House
- Mayfield Community Center
- Mental Health America
- Micah Ecumenical Ministries
- Moss Free Clinic
- St George's Episcopal Church
- Thurman Brisben Center
- True Faith Community Church
- Virginia Community Food Connections

### **King George Workgroup:**

- Community Member
- King George Fire, Rescue and Emergency Services
- King George County NAACP
- King George County Public Schools
- Naval Support Facility Dahlgren

### **Spotsylvania Workgroup:**

- Catholic Charities
- Fredericksburg Christian Health Center
- Imani Multicultural Center
- Spotsylvania County Department of Social Services
- Empowerhouse
- Mount Hope Baptist Church
- Mt Zion Baptist Church
- Rappahannock Area YMCA
- Salem Fields Community Church
- Spotsylvania County Fire, Rescue, and Emergency Management
- Spotsylvania County Parks and Recreation
- Spotsylvania County Public Schools
- Spotsylvania County- County Administrator's Office
- Spotsylvania County NAACP
- Veteran's Administration
- Virginia Organizing

### **Stafford County Workgroup:**

- #Enough
- LUCHA Ministries
- New Hope Christian Church
- Stafford County - County Administrator's Office
- Stafford County Department of Social Services
- Stafford County Fire and Rescue
- Stafford Parks, Recreation and Community Facilities
- Stafford County Public Schools
- *Stafford County NAACP*
- United Faith Christian Ministries

# Appendix D: Local Public Health Systems Assessment (LPHSA) Overview

The LPHSA is the final assessment of the MAPP process, and we need your help completing it! This assessment will review how well our local public health system (LPHS) addresses the 10 essential functions of public health (see Figure 1 below).

When ranking how well each essential function is addressed it is best to consider the local public health system holistically; it is not just the health department or local hospital system. This system includes any and all entities that contribute to the delivery of public health services in our community. For examples of which entities are included, see Figure 2.

Figure 1

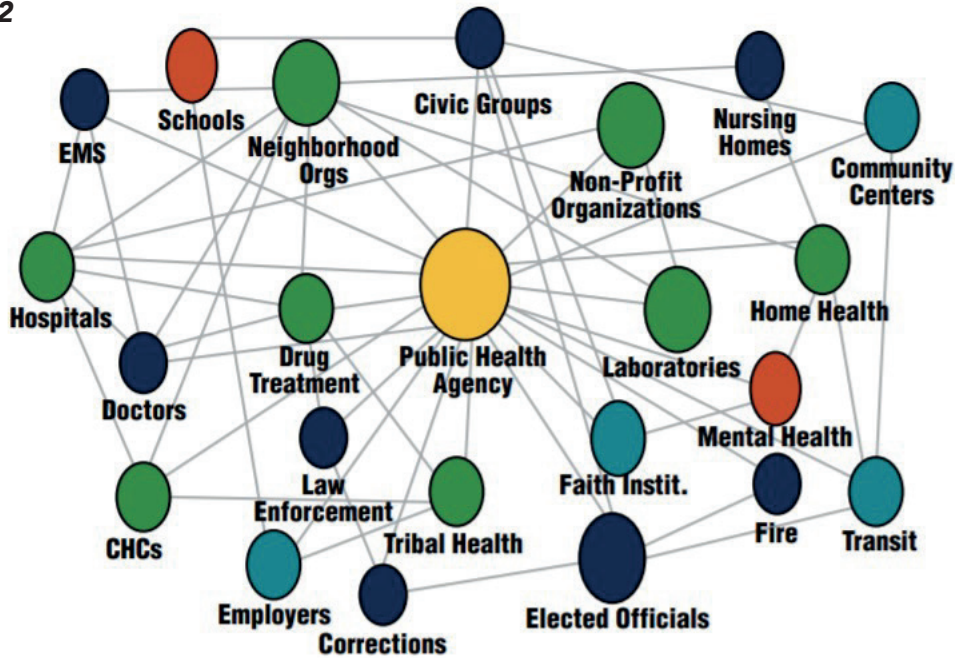

Figure 2

In order to prepare for the upcoming steering committee meeting during which we will complete the LPHSA, please complete the below rankings of our LPHS using a scale of 1 to 10 (with 1 being the lowest and 10 being the highest). Bring your rankings to the meeting.

**Think of each ranking as “On a scale of 1 to 10, what is the priority of each standard to our LPHS?”**

Below each ranking, in italics, are examples of questions we will ask you to answer during the meeting. Answer choices for these questions range from “no activity” to “optimal activity.”

	Ranking (1-10)
<b>Essential function 1: Monitor health status to identify community health problems</b>	
Population-based Community Health Assessment (CHA) <i>At what level does the LPHS conduct regular CHAs?</i>	
Current technology to manage and communicate population health data <i>At what level does the LPHS use the best available technology and methods to display data on the public's health?</i>	
Maintaining population health registries <i>At what level does the LPHS collect timely data consistent with current standards on health concerns in order to provide data to population health registries?</i>	
<b>Essential function 2: Diagnose and investigate health problems and health hazards</b>	
Identifying and monitoring health threats <i>At what level does the LPHS participate in a comprehensive surveillance system with national, state, and local partners to identify, monitor, and share information and understand emerging health problems and threats?</i>	
Investigating and responding to public health threats and emergencies <i>At what level does the LPHS maintain written instructions on how to handle communicable diseases, including details about case findings, contact tracing, and source identification and containment?</i>	
Lab support for investigating health threats <i>At what level does the LPHS have ready access to labs that can meet routine public health needs for finding out what health problems are occurring?</i>	
<b>Essential function 3: Inform, educate, and empower people about health issues</b>	
Health education and promotion <i>At what level does the LPHS provide policymakers, stakeholders, and the public with ongoing analyses of community health status and related recommendations for health promotion policies?</i>	
Health communication <i>At what level does the LPHS develop health communication plans for media and public relations and for sharing information among organizations?</i>	
Risk communication <i>At what level does the LPHS develop an emergency communications plan for each stage of an emergency to allow for the effective dissemination of information?</i>	

#### Essential function 4: Mobilize community partnerships to identify and solve health problems

Constituency development

*At what level does the LPHS maintain a complete and current directory of community organizations?*

Community partnerships

*At what level does the LPHS establish community partnerships and strategic alliances to provide a comprehensive approach to improving health in the community?*

#### Essential function 5: Develop policies and plans that support individual and community health efforts

Governmental presence at the local level

*At what level does the LPHS support the work of the local health department to make sure the 10 essential services are provided?*

Public health policy development

*At what level does the LPHS contribute to public health policies by engaging in activities that inform the policy development process?*

Community health improvement process and strategic planning

*At what level does the LPHS establish a CHIP, with broad-based diverse participation, that uses information from the CHA, including the perceptions of community members?*

Plan for public health emergencies

*At what level does the LPHS support a workgroup to develop and maintain emergency preparedness and response plans?*

#### Essential function 6: Enforce laws and regulations that protect health and ensure safety

Reviewing and evaluating laws, regulations, and ordinances

*At what level does the LPHS identify public health issues that can be addressed through laws, regulations, or ordinances?*

Involvement in improving laws, regulations, and ordinances

*At what level does the LPHS identify local public health issues that are inadequately addressed in existing laws, regulations, and ordinances?*

Enforcing laws, regulations, and ordinances

*At what level does the LPHS identify organizations that have the authority to enforce public health laws, regulations, and ordinances?*

#### Essential function 7: Link people to needed personal health services and assure the provision of healthcare when otherwise unavailable

Identifying personal health service needs of populations

*At what level does the LPHS identify groups of people in the community who have trouble accessing or connecting to personal health services?*

Ensuring people are linking to personal health services

*At what level does the LPHS connect or link people to organizations that can provide the personal health services they may need?*

### Essential function 8: Assure a competent public health and personal healthcare workforce

Workforce assessment, planning, and development

*At what level does the LPHS complete a workforce assessment, a process to track the numbers and types of LPHS jobs and the associated knowledge, skills, and abilities required of the jobs?*

Public health workforce standards

*At what level does the LPHS ensure that all members of the local public health workforce have the required certificates, licenses, and education needed to fulfill their job duties and comply with legal requirements?*

Life-long learning through CE, training, and mentoring

*At what level does the LPHS identify education and training needs and encourage the public health workforce to participate in available education and training?*

Public health leadership development

*At what level does the LPHS provide access to formal and informal leadership development opportunities for employees at all organizational levels?*

### Essential function 9: Evaluate effectiveness, accessibility, and quality of personal and population-based health services

Evaluation population-based health services

*At what level does the LPHS evaluate how well population-based health services are working, including whether the goals that were set for programs and services were achieved?*

Evaluating personal health services

*At what level does the LPHS evaluate the accessibility, quality, and effectiveness of personal health services?*

Evaluating the LPHS

*At what level does the LPHS identify all public, private, and voluntary organizations that contribute to the delivery of the 10 essential services?*

### Essential function 10: Research for new insights and innovative solutions to health problems

Fostering innovation

*At what level does the LPHS provide staff with the time and resources to pilot test or conduct studies to test new solutions to public health problems and see how well they actually work?*

Linking with institutions of higher learning and/or research

*At what level does the LPHS develop relationships with colleges, universities, or other research organizations, with a free flow of information, to create formal and informal arrangements to work together?*

Capacity to initiative or participate in research

*At what level does the LPHS collaborate with researchers who offer the knowledge and skills to design and conduct health-related studies?*

## Appendix E: Forces of Change Assessment Table of Results

### Forces of Change Affecting Health in the Rappahannock Area Health District

	Events	Factors	Trends
Economic		Volatility of job market	Workforce shortage, especially in public realm (public health, schools, healthcare, law enforcement)
		Volatility of job market	Trouble maintaining public works and services due to demand
		Volatility of job market	Commuting further for work, typically living in South and driving North
		Volatility of job market	Poor continuity of care and education due to having to move to where jobs are available
		Volatility of job market	Shift in population from rural to suburban
	Inflation	Lack of affordable housing	Multigenerational housing out of necessity
	Inflation	Lack of affordable housing	Generational poverty
	Inflation	Lack of affordable housing	Metrics used to determine eligibility for economic assistance becoming more stringent
	Inflation	Lack of affordable housing	Population migration, North to South
	Medicaid expansion in 2019		Better access to providers for patients
	HCC opening for VA		Better access to providers for veterans/ VA patients
	HCC opening for VA		Greater healthcare workforce shortage for general population
	Express lane expansion		Worsening traffic and pollution (air and noise)
	Development (Amazon and DHL)		Migration to community for new job opportunities (500+ from new facilities)
	National opioid settlement	Settlement funding to provide resources through community partners	Public focus on tackling substance use and abuse together
		Limited public transportation	Difficulty getting and maintaining a job
		Limited public transportation	Investment in infrastructure (8 new road projects in 5-7 years in Stafford alone)
	COVID-19		Increased funding for healthcare and social works
	COVID-19	Supply chain issues	Collaboration between businesses to get work done efficiently and find needed products
Environmental	Climate change		Disproportionate economic and health impacts on low-income communities
	Climate change		Severe weather events such as coastal and flash flooding threatening community
	Climate change	Harmful algae blooms	Less recreational activities occurring on Lake Anna
	Climate change	Harmful algae blooms	Decreased tourism in Lake Anna area
		Poor tap water quality in Caroline	Cost of water very high (higher than electric in some communities)

## Forces of Change Affecting Health in the Rappahannock Area Health District

	Events	Factors	Trends
Legal/Political	Regulatory changes in field of mental health	Workforce burden and low retention rates	Workforce shortage
	Regulatory changes in field of mental health	Workforce burden and low retention rates	State hospitals taking less admissions, responsibility falling on smaller localities
	Regulatory changes in field of mental health	Workforce burden and low retention rates	Difficulty accessing mental health services
	Regulatory changes in field of mental health	Workforce burden and low retention rates	Family and friends acting as caregivers without proper training
	Regulatory changes in field of mental health; Marcus Act		Accountability for public service responders during behavioral health emergencies; resources for behavioral health emergencies
	2016 and 2020 Presidential elections	Increased polarization of politics	Increase in public violence (especially schools) and misinformation
	2016 and 2020 Presidential elections	Increased polarization of politics	Difficulty funding and maintaining public services and works in localities
	2016 and 2020 Presidential elections	Increased polarization of politics	Lack of timely response from officials on public concerns
	2016 and 2020 Presidential elections	Increased polarization of politics	Trouble enforcing rules and regulations
	Legalization of marijuana		Confusion among citizens about discrepancy between federal and state laws
			Law enforcement having trouble enforcing new laws
Social	Black Lives Matter movement beginning in mid-2020	Large number of social justice movements locally	Awareness among community about social issues
	Black Lives Matter movement beginning in mid-2020	Large number of social justice movements locally	Increased need and availability of education on social issues
		Information sharing	Loss of smaller media outlets causing difficulty in getting key messages out to the public; RAHD has FLS but lacks additional outlets to reach general population
	COVID-19	Information sharing	Increase in misinformation and distrust in media sources
		Unite Us referral platform	Shift toward viewing health in holistic way
		Unite Us referral platform	Connectedness within healthcare system
		Food deserts	Trouble accessing healthy foods
		Food deserts	Healthy options becoming more expensive due to demand
		Food deserts	Increased collaboration among food service groups to reach vulnerable populations
	COVID-19	Teleworking, need for social distancing	Social isolation, negative effects on mental health
	COVID-19	Exposing health inequities between demographics	Focus on underlying health issues and social determinants of health
Technological/Scientific	COVID-19	Emphasis on using electronic software and systems for personal information	Improvement in online and electronic security systems
	COVID-19	Shift to online learning	Disparities in broadband access, less educational opportunity for rural populations

## Forces of Change Meeting Notes (consolidated)

Force	Force Category (social, economic, political, technological, environmental, scientific, legal, ethical)	Threats Posed	Opportunities Created	Factors	Trends
COVID-19	Event	Transmission in community, social isolation, increased trouble accessing services, workforce logistics/ returning to work, politization of healthcare, COVID fatigue	Funding, focus on underlying conditions/ related health issues, exposing health inequities, work from home (less commute), creativity in getting business done, increased innovation around workforce shortages (virtual RN, ICU)	Workforce shortage, supply chain problems, assistance programs	Cost of healthcare increases, access/ availability decreases, childcare shortage; Collaboration among businesses to fill needs and share resources, questioning the need of things; trouble paying bills once assistance ends
Increased cost of living/ inflation (housing, gas, food, etc.)	Economic	Difficult to make ends meet	Increased need for collaboration among food service groups	Lack of affordable housing; metrics to qualify for assistance changing	Multigenerational housing out of necessity; generational poverty
Social justice movements	Social	People of color with decreased access and level of service in healthcare	Increased awareness among population, getting to the root of the problem, realizing a need for community education on topic		
Regulatory changes	Political, Legal	Especially in mental health, preventing people from entering the field, workforce burden, decreased retention rates	Long-term improvement in access, lays foundation		
Information sharing	Social	Media overload, misinformation, mental health effects, loss of smaller media outlets, distrust in media, more time needed to make informed decisions due to conflicting sources, hard to get info to rural populations due to lack of broadband internet; Need for direct messaging from trusted sources (employers, health department, etc.), context of COVID and vaccines/ boosters, trouble getting messaging out to the public (have FLS)	Increased ease of communication		
Polarization in politics	Political	Uncertainty about the future among communities when state administrations change, uncertainty about funding, increased public violence and misinformation	New ideas in office when leadership changes		
Population growth and migration	Social, economic	Housing costs increasing (people with high salaries working in RAHD and commuting North for work), traffic, growing pains/ shifting ideologies, need for language services; bouncing from 1 community to another makes continuity of care and education difficult, harder to access public services due to demand	Jobs, resources, public transportation (EZ pass and VRE), increased infrastructure, diversity and new culture in communities		Shift from rural to suburban or further South for economic reasons
Unite Us referral system	Event	Better connection in health field, holistic view of health	New resource to be managed, new system to learn for users		

## Forces of Change Meeting Notes (consolidated)

Force	Force Category (social, economic, political, technological, environmental, scientific, legal, ethical)	Threats Posed	Opportunities Created	Factors	Trends
Climate change	Environmental	Local weather impacts, disproportionate impact on low-income communities, health effects, recreational activities (harmful algae blooms); Mental health concern, severe weather events threatening health, long-term effects on health, flash flooding on the Rappahannock, coastal flooding events	Innovation, rethinking current systems		
Security	Technological	Access to personal information if breached, working from home	Easy to access your own information on many platforms		
Medicaid expansion in 2019	Event		Increased access for patients		
HCC opening for VA	Event	Potential workforce shortage for other residents/ medical providers (government, NGO)	Access to care for veterans		
Algae blooms at lake anna	Environmental	Decreased tourism, loss of lake for recreation			
Express lane expansion	?	Increased traffic during building phase, possibly more noise and air pollution when complete	Less congested roads when complete, shorter commute		
Business expansion (Amazon, DHL)	Economic/ event	Increased traffic, more people utilizing public services	New job opportunities (500+)		
Census redistricting	Event/political	Impacts on local politics	Better representation		
National opioid settlement	Event/economic	Opioid addiction and overdose continues to be a problem	Settlement funding to provide resources through community partners, focus on mental health and drug abuse		
Job market	Economic	Workforce shortage, issues with transportation (school bus drivers), very competitive wages with Northern VA, trouble maintaining public works (parks, rec, roads, etc.), hard for government to compete with private industry that can pay more (clinical nurses for RAHD, nurses for public schools)	Low unemployment		
Limited public transportation		Trouble getting and holding a job, trouble accessing childcare or healthcare, transportation hard to access and use, transportation unreliable (routes/ times unknown)	Increased awareness of issue, discussion about how to solve transportation issues/ improve access-- investment in infrastructure (1B in next 5 yrs), 8 new road projects in next 5-7 years		
Poor water quality	Environmental	Expensive to buy bottled water, water bills very expensive (more than electric), only 1 option for water so forced to pay high costs, possible health effects due to poor quality			
Lack of government response to timely issues (federal, state, local)	Political	Workforce shortage, issues funding public services (fire and rescue, schools), lack of continuity between federal and state law (legalization of marijuana) making enforcement difficult			

## Forces of Change Meeting Notes (consolidated)

Force	Force Category (social, economic, political, technological, environmental, scientific, legal, ethical)	Threats Posed	Opportunities Created	Factors	Trends
Mental health system changes; state hospitals taking lower admissions, trickle down to local hospitals, Marcus Act	Social, event	Trouble accessing mental health services, caregivers not being properly trained (family members or friends taking on the role)			
Poor eating habits/ food deserts		Trouble accessing healthy food options, healthy food options are typically expensive, supply chain issues, not wanting to try new foods			
Increase in substance use and abuse		Increase in overdoses, Pending legalization of marijuana,			

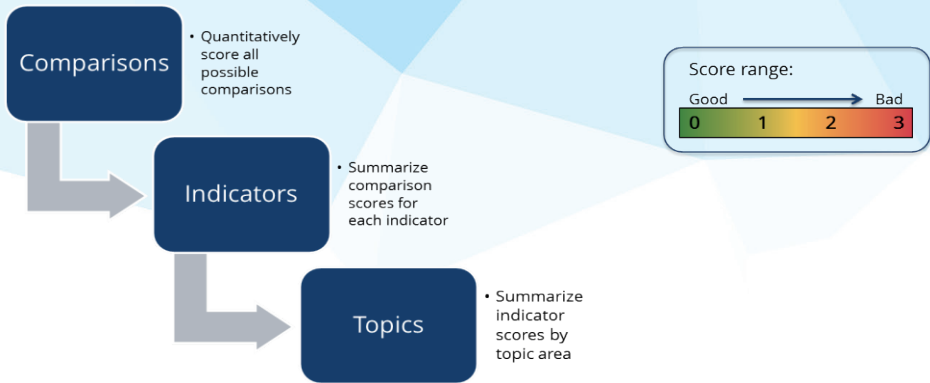

# Appendix F: Quantitative Data

## Conduent Healthy Communities Institute Data Scoring Tool - Methodology

### Scoring Method

Data Scoring is done in three stages:

For each indicator, your county is assigned a score based on its comparison to other communities, whether health targets have been met, and the trend of the indicator value over time. These comparison scores range from 0-3, where 0 indicates the best outcome and 3 the worst. Availability of each type of comparison varies by indicator and is dependent upon the data source, comparability with data collected for other communities, and changes in methodology over time.

Indicators are categorized into topic areas and each topic area receives a score. Indicators may be categorized in more than one topic area. Topic scores are determined by the comparisons of all indicators within the topic.

### Comparison to Values: State, National, and Targets

Your county is compared to the state value, the national value, and target values. Targets values include the nation-wide Healthy People 2030 (HP2030) goals as well as locally set goals. Healthy People 2030 goals are national objectives for improving the health of the nation set by the Department of Health and Human Services’ (DHHS) Healthy People Initiative. For all value comparisons, the scoring depends on whether the county value is better or worse than the comparison value, as well as how close the county value is to the target value.

HCI Platform Compare to State or National Value

HCI Platform Compare to Healthy People 2030 Target

### Trend Over Time

The Mann-Kendall statistical test for trend was used to assess whether the county value is increasing over time or decreasing over time, and whether the trend is statistically significant. The trend comparison uses the four most recent

comparable values for the county, and statistical significance is determined at the 90% confidence level. For each indicator with values available for four time periods, scoring was determined by direction of the trend and statistical significance.

### **Missing Values**

Indicator scores are calculated using the comparison scores, availability of which depends on the data source. If the comparison type is possible for an adequate proportion of indicators on the community dashboard, it will be included in the indicator score. After exclusion of comparison types with inadequate availability, all missing comparisons are substituted with a neutral score for the purposes of calculating the indicator's weighted average. When information is unknown due to lack of comparable data, the neutral value assumes that the missing comparison score is neither good nor bad.

### **Indicator Scoring**

Indicator scores are calculated as a weighted average of all included comparison scores. If none of the included comparison types are possible for an indicator, no score is calculated and the indicator is excluded from the data scoring results.

### **Topic Scoring**

Indicator scores are averaged by topic area to calculate topic scores. Each indicator may be included in up to three topic areas if appropriate. Resulting scores range from 0-3, where a higher score indicates a greater level of need as evidenced by the data. A topic score is only calculated if it includes at least three indicators.

### **Significant Disparities**

When a given indicator has data available for subgroups like race/ethnicity, age or gender—and values for these subgroups include confidence intervals—we are able to determine if there is a significant difference between the subgroups value and the overall value. A significant difference is defined as two values with non-overlapping confidence intervals. Only significant differences in which a subgroup is worse than the overall value is identified.

## Data Scoring Topics and Indicator Results by County

County: Caroline  
Mary Washington Health System  
Total indicators: 174

Thursday 16th of December 2021 08:40:49 AM

Topic	Indicators	Score
Education	8	1.92
Heart Disease & Stroke	16	1.83
Health Care Access & Quality	9	1.78
Oral Health	4	1.76
Immunizations & Infectious Diseases	11	1.73

# Disparities and Health Equity Analysis

Identifying disparities by race/ethnicity, gender, age, and geography helps to inform and focus priorities and strategies. Understanding disparities also help us better understand root causes that impact health in a community and inform action towards health equity. Health equity focuses on the fair distribution of health determinants, outcomes and resources across communities.<sup>1</sup> National trends have shown that systemic racism, poverty, and gender discrimination have led to poorer health outcomes for groups such as Black, Indigenous, or People of Color, individuals living below the poverty level, and LGBTQ+ communities.

Primary and secondary data revealed significant community health disparities based on race/ethnicity, particularly among the Black, Asian and Hispanic communities. The assessment also found zip codes, cities, and municipalities with disparities related to health and social determinants of health. It is important to note that while much of the data is presented to show differences and disparities of data by population groups, differences within each population group can be as great as differences between different groups. For instance, Asian or Asian and Pacific Islander encompasses individuals from over 40 different countries with very different languages, cultures, and histories in the U.S. Information and themes captured through an online community survey have been shared to provide a more comprehensive and nuanced understanding of each community's experiences.

## Caroline County, Virginia

### Race/Ethnic & Gender Disparities for Caroline County, VA

Community health disparities were assessed in both the primary and secondary data collection processes. Table 1 below identifies secondary data health indicators with a statistically significant race or ethnic disparity, and gender disparity for Caroline County.

**TABLE 1. INDICATORS WITH SIGNIFICANT RACE/ETHNIC & GENDER DISPARITIES**

Health Indicator	Group Negatively Impacted (highest rates)
Children Living Below Poverty Level	Black/African American, American Indian/Alaska Native, Multiple Races; Hispanic/Latino
People Living Below Poverty Level	Black/African American, American Indian/Alaska Native, Multiple Races; Hispanic/Latino

<sup>1</sup> Klein R, Huang D. Defining and measuring disparities, inequities, and inequalities in the Healthy People initiative. National Center for Health Statistics. Center for Disease Control and Prevention. [https://www.cdc.gov/nchs/ppt/nchs2010/41\\_klein.pdf](https://www.cdc.gov/nchs/ppt/nchs2010/41_klein.pdf)

<b>Health Indicator</b>	<b>Group Negatively Impacted (highest rates)</b>
<b>Families Living Below Poverty Level</b>	Black/African American, American Indian/Alaska Native, Multiple Races; Hispanic/Latino
<b>People 65+ Living Below Poverty Level</b>	Black/African American, Multiple Races, Hispanic/Latino
<b>Workers Commuting by Public Transportation</b>	Black/African American, Asian, American Indian/Alaska Native, Multiple Races, Other Race; Hispanic/Latino
<b>Workers who Walk to Work</b>	Black/African American, White, American Indian/Alaska Native
<b>Babies with Low Birth Weight</b>	Black/African American
<b>Babies with Very Low Birth Weight</b>	Black/African American
<b>Workers Commuting by Public Transportation</b>	Female
<b>Workers who Walk to Work</b>	Female
<b>Age-Adjusted Death Rate due to Lung Cancer</b>	Male
<b>Colorectal Cancer Incidence Rate</b>	Male
<b>Age-Adjusted Death Rate due to Cerebrovascular Disease (Stroke)</b>	Male
<b>Age-Adjusted Death Rate due to Unintentional Injuries</b>	Male

The indicators listed in Table 1 show a statistically significant difference in race or ethnicity and gender according to the Index of Disparity analysis. Secondary data reveal that different race groups are disparately impacted for many poverty-related indicators, which are often associated with poorer health outcomes. Additionally, the Black/African American, Asian, and Hispanic populations are the most negatively impacted race groups in Caroline County, experiencing significant disparities, of indicators listed in Table 1. These important disparities in data should be recognized and considered for implementation planning to mitigate the disparities often faced along racial, ethnic, or cultural lines in Caroline County.

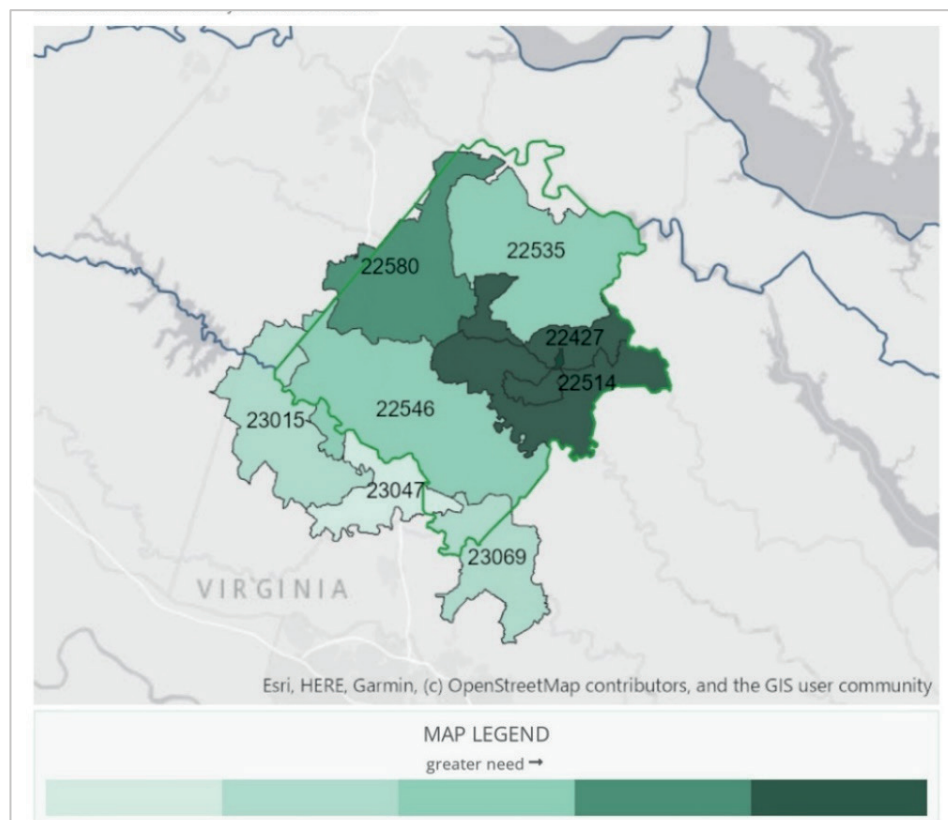

## Geographic Disparities for Caroline County, VA

Geographic disparities were identified using the SocioNeeds Index® and Food Insecurity Index. These indices have been developed by Conduent Healthy Communities Institute to easily identify areas of high socioeconomic need or food insecurity. Conduent's SocioNeeds Index estimates areas of highest socioeconomic need correlated with poor health outcomes. Conduent's Food Insecurity Index estimates areas of low food accessibility correlated with social and economic hardship. For both indices, counties, zip codes, and census tracts with populations over 300 are assigned index values ranging from zero to 100, where higher values are correlated with highest needs. Understanding communities with highest need and where they are localized is critical to targeting prevention and outreach activities.

### SocioNeeds Index

Conduent's SocioNeeds Index estimates areas of highest socioeconomic need correlated with poor health outcomes. Based on the SocioNeeds Index, in Caroline County, zip codes are ranked based on their index value to identify the relative needs, as illustrated by the map in Figure 1. The following zip codes had the highest socioeconomic need (as indicated by the darkest shades of green): 22514 (Milford) and 22427 (Bowling Green). Table 2 provides the index values for each zip code.

**FIGURE 1. SOCIONEEDS INDEX**

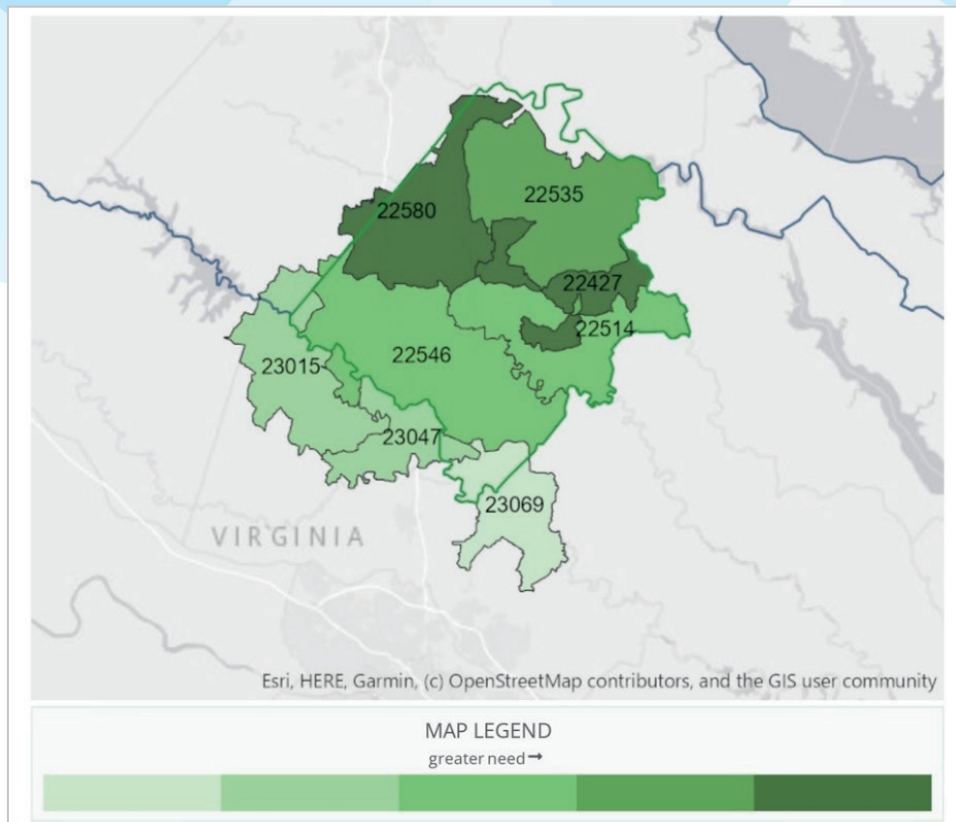

**TABLE 2. SNI VALUES BY ZIP CODE**

Zip Code	Area Name	Index Value
22514	Milford	55.3
22427	Bowling Green	49.5
22580	Woodford	40.5
22546	Ruther Glen	30.8
22535	Port Royal	29.9
23015	Beaverdam	20.7
23069	Hanover	18.8
23047	Doswell	15.1

### Food Insecurity Index

Conduent's Food Insecurity Index estimates areas of low food accessibility correlated with social and economic hardship. Based on the Food Insecurity Index, in Caroline County, zip codes are ranked based on their index value to identify needs relative to surrounding zip codes, as illustrated by the map in Figure 2. The following zip codes had the highest level of food insecurity (as indicated by the darkest shades of green): 22580 (Woodford) and 22427 (Bowling Green). Table 3 provides the index values for each zip code.

**FIGURE 2. FOOD INSECURITY INDEX**

**TABLE 3. FOOD INSECURITY INDEX VALUES BY ZIP CODE**

Zip Code	Area Name	Index Value
22580	Woodford	48.5
22427	Bowling Green	45.2
22535	Port Royal	41.8
22546	Ruther Glen	39.3
22514	Milford	38.7
23047	Doswell	18.9
23015	Beaverdam	18.7
23069	Hanover	13.8

# Fredericksburg City, Virginia

## Race/Ethnic & Gender Disparities for Fredericksburg City, VA

Community health disparities were assessed in both the primary and secondary data collection processes. Table 4 below identifies secondary data health indicators with a statistically significant race or ethnic disparity, and gender disparity for Fredericksburg County.

**TABLE 4. INDICATORS WITH SIGNIFICANT RACE/ETHNIC & GENDER DISPARITIES**

Health Indicator	Group Negatively Impacted (highest rates)
4 <sup>th</sup> Grade Students Proficient in Math	Black/African American; Hispanic / Latino
Babies with Low Birth Weight	Black/African American
Babies with Very Low Birth Weight	White, Other Race
Families Living Below Poverty Line	Black/African American, Multiple Races, Other Race; Hispanic / Latino
Infant Mortality Rate	Black/African American, Other Race
People 65+ Living Below Poverty Line	Black/African American, Asian
Teen Birth Rate	Black/African American, Other Race
Children Living Below Poverty Level	Male
People 65+ Living Below Poverty Level	Female
8 <sup>th</sup> Grade Students Proficient in Math	Male
8 <sup>th</sup> Grade Students Proficient in Reading	Male
Workers Commuting by Public Transportation	Female

The indicators listed in Table 4 show a statistically significant difference in race or ethnicity according to the Index of Disparity analysis. Secondary data reveal that different race groups are disparately impacted for many poverty-related indicators, which are often associated with poorer health outcomes. Additionally, the Black/African American, Asian, and Hispanic populations are the most negatively impacted race groups in Fredericksburg County, experiencing significant disparities, of indicators listed in Table 4. These important disparities in data should be recognized and considered for implementation planning to mitigate the disparities often faced along racial, ethnic, or cultural lines in Fredericksburg County.

## Geographic Disparities for Fredericksburg City, VA

Geographic disparities were identified using the SocioNeeds Index® and Food Insecurity Index. These indices have been developed by Conduent Healthy Communities Institute to easily identify areas of high socioeconomic need or food insecurity. Conduent's SocioNeeds Index estimates areas of highest socioeconomic need correlated with poor health outcomes. Conduent's Food Insecurity Index estimates areas of low food accessibility correlated with social and economic hardship. For both indices, counties, zip codes, and census tracts with populations over 300 are assigned index values ranging from zero to 100, where higher values are correlated with highest needs. Understanding communities with highest need and where they are localized is critical to targeting prevention and outreach activities.

### SocioNeeds Index

Conduent's SocioNeeds Index estimates areas of highest socioeconomic need correlated with poor health outcomes. A single zip code, 22401, constitutes all of Fredericksburg County. The map in Figure 3 illustrates this zip code. Table 5 provides the index value.

**FIGURE 3. SOCIONEEDS INDEX**

**TABLE 5. SOCIONEEDS INDEX VALUES BY ZIP CODE**

Zip Code	Area Name	Index Value
22401	Fredericksburg	37

### Food Insecurity Index

Conduent's Food Insecurity Index estimates areas of low food accessibility correlated with social and economic hardship. A single zip code, 22401, constitutes all of Fredericksburg County. The map in Figure 4 illustrates this zip code. Table 6 provides the index value.

**FIGURE 4. FOOD INSECURITY INDEX**

**TABLE 6. FOOD INSECURITY INDEX VALUES BY ZIP CODE**

Zip Code	Area Name	Index Value
22401	Fredericksburg	43

# King George County, Virginia

## Race/Ethnic & Gender Disparities for King George County, VA

Community health disparities were assessed in both the primary and secondary data collection processes. Table 7 below identifies secondary data health indicators with a statistically significant race or ethnic disparity, and gender disparity for King George County.

**TABLE 7. INDICATORS WITH SIGNIFICANT RACE/ETHNIC & GENDER DISPARITIES**

<b>Health Indicator</b>	<b>Group Negatively Impacted (highest rates)</b>
<b>Babies with Very Low Birth Weight</b>	White
<b>Families Living Below Poverty Level</b>	Black/African American, Asian
<b>Infant Mortality Rate</b>	White
<b>People 65+ Living Below Poverty Level</b>	Black/African American; Hispanic/Latino
<b>People Living Below Poverty Level</b>	Black/African American, White, American Indian/Alaska Native
<b>Teen Birth Rate</b>	Black/African American
<b>Workers Commuting by Public Transportation</b>	White, American Indian/Alaska Native, Multiple Races, Other Race; Hispanic/Latino
<b>Workers who Walk to Work</b>	White, American Indian/Alaska Native, Multiple Races, Other Race
<b>People Living Below Poverty Level</b>	Female
<b>Workers Commuting by Public Transportation</b>	Male
<b>Workers who Walk to Work</b>	Female

Health Indicator	Group Negatively Impacted (highest rates)
Age-Adjusted Death Rate due to Cancer	Male
Age-Adjusted Death Rate due to Lung Cancer	Male

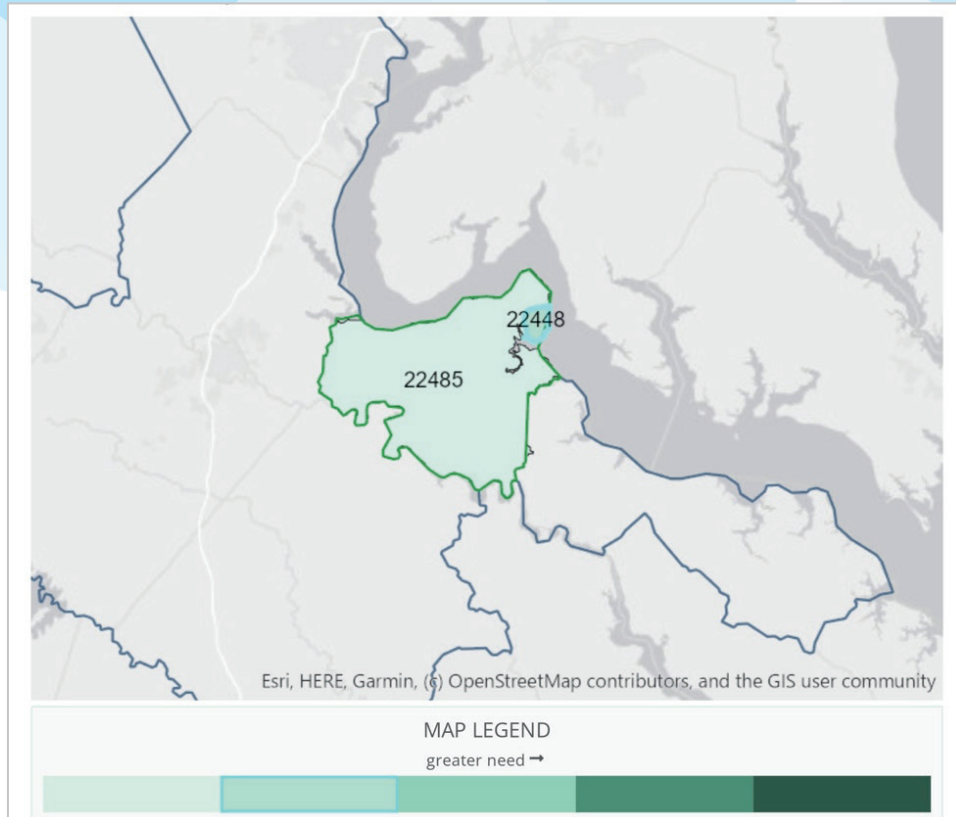

The indicators listed in Table 7 show a statistically significant difference in race or ethnicity according to the Index of Disparity analysis. Secondary data reveal that different race groups are disparately impacted for many poverty-related indicators, which are often associated with poorer health outcomes. Additionally, the Black/African American, Asian, and Hispanic populations are the most negatively impacted race groups in King George County, experiencing significant disparities, of indicators listed in Table 7. These important disparities in data should be recognized and considered for implementation planning to mitigate the disparities often faced along racial, ethnic, or cultural lines in King George County.

## Geographic Disparities for King George County, VA

Geographic disparities were identified using the SocioNeeds Index® and Food Insecurity Index. These indices have been developed by Conduent Healthy Communities Institute to easily identify areas of high socioeconomic need or food insecurity. Conduent's SocioNeeds Index estimates areas of highest socioeconomic need correlated with poor health outcomes. Conduent's Food Insecurity Index estimates areas of low food accessibility correlated with social and economic hardship. For both indices, counties, zip codes, and census tracts with populations over 300 are assigned index values ranging from zero to 100, where higher values are correlated with highest needs. Understanding communities with highest need and where they are localized is critical to targeting prevention and outreach activities.

### SocioNeeds Index

Conduent's SocioNeeds Index estimates areas of highest socioeconomic need correlated with poor health outcomes. Based on the SocioNeeds Index, in King George County, the two zip codes are ranked based on their index value to identify the relative needs, as illustrated by the map in Figure 5. The two zip codes are: 22448 (Dahlgren) and 22485 (Shiloh). Table 8 provides the index values for each zip code.

**TABLE 8. SOCIONEEDS INDEX VALUES BY ZIP CODE**

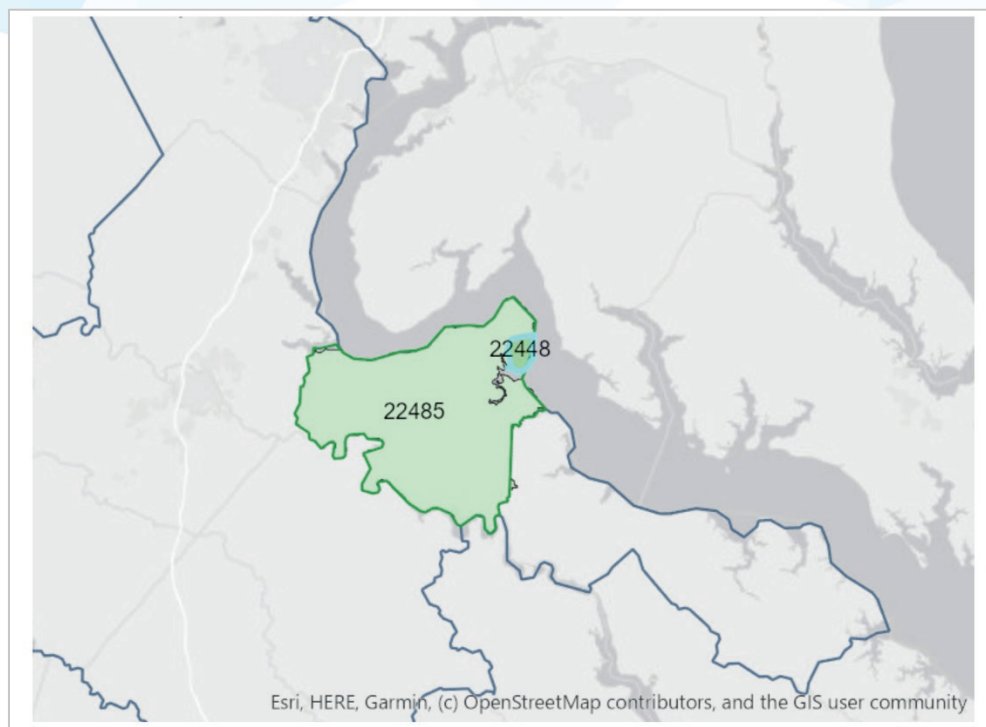

Zip Code	Area Name	Index Value
22448	Dahlgren	36.3
22485	Shiloh	13.8

## Food Insecurity Index

Conduent's Food Insecurity Index estimates areas of low food accessibility correlated with social and economic hardship. Based on the Food Insecurity Index, in King George County, the two zip codes are ranked based on their index value to identify the relative needs, as illustrated by the map in Figure 6. The two zip codes are: 22448 (Dahlgren) and 22485 (Shiloh). Table 9 provides the index values for each zip code.

**FIGURE 6. FOOD INSECURITY INDEX**

Zip Code	Area Name	Index Value
22448	Dahlgren	34.9
22485	Shiloh	20.6

# Orange County, Virginia

## Race/Ethnic & Gender Disparities for Orange County, VA

Community health disparities were assessed in both the primary and secondary data collection processes. Table 10 below identifies secondary data health indicators with a statistically significant race or ethnic disparity, and gender disparity for Orange County.

**TABLE 10. INDICATORS WITH SIGNIFICANT RACE/ETHNIC & GENDER DISPARITIES**

<b>Health Indicator</b>	<b>Group Negatively Impacted (highest rates)</b>
<b>Babies with Low Birth Weight</b>	Black/African American, Other Race
<b>Babies with Very Low Birth Weight</b>	Black/African American, Other Race
<b>Families Living Below Poverty Level</b>	Black/African American
<b>Infant Mortality Rate</b>	Black/African American
<b>People 65+ Living Below Poverty Level</b>	White, Multiple Races
<b>Teen Birth Rate</b>	Black/African American, Other Race
<b>Workers Commuting by Public Transportation</b>	White, Asian, American Indian/Alaska Native
<b>Workers who Walk to Work</b>	Black/African American, Asian, American Indian/Alaska Native, Other Race
<b>Age-Adjusted Death Rate due to Lung Cancer</b>	Male
<b>Age-Adjusted Death Rate due to Unintentional Injuries</b>	Male
<b>Children Living Below Poverty Level</b>	Female

Health Indicator	Group Negatively Impacted (highest rates)
Colorectal Cancer Incidence Rate	Male
Workers Commuting by Public Transportation	Female
Workers who Walk to Work	Male

The indicators listed in Table 10 show a statistically significant difference in race or ethnicity according to the Index of Disparity analysis. Secondary data reveal that different race groups are disparately impacted for many poverty-related indicators, which are often associated with poorer health outcomes. Additionally, the Black/African American, Asian, and Hispanic populations are the most negatively impacted race groups in Orange County, experiencing significant disparities, of indicators listed in Table 10. These important disparities in data should be recognized and considered for implementation planning to mitigate the disparities often faced along racial, ethnic, or cultural lines in Orange County.

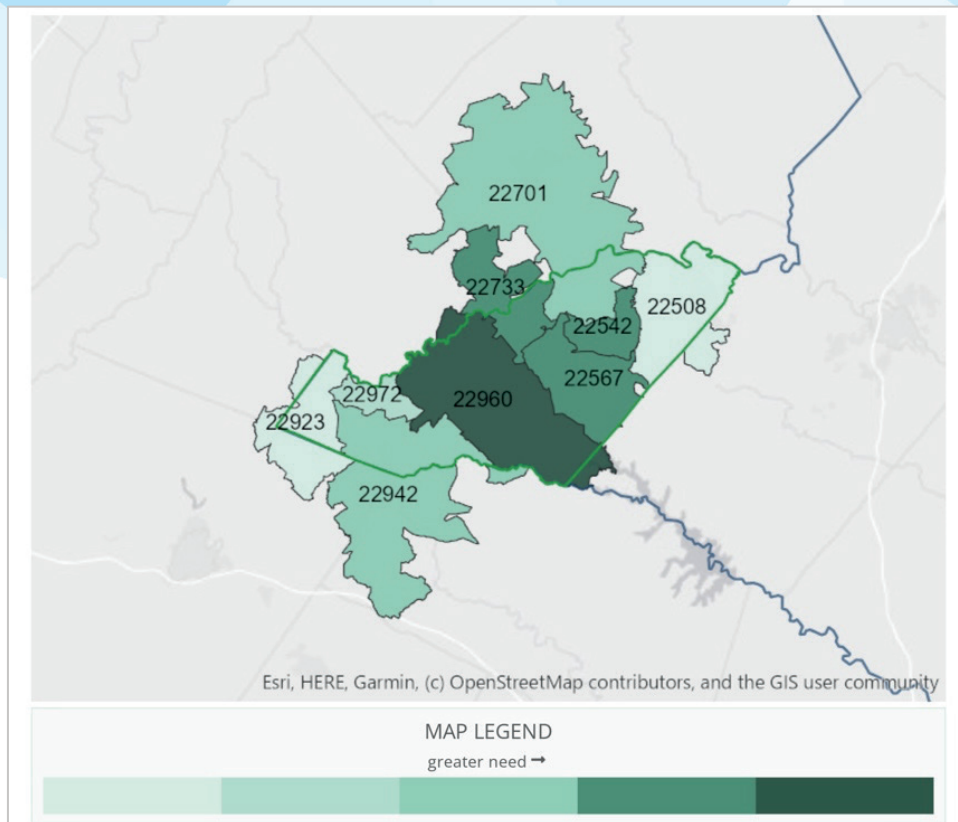

## Geographic Disparities for Orange County, VA

Geographic disparities were identified using the SocioNeeds Index® and Food Insecurity Index. These indices have been developed by Conduent Healthy Communities Institute to easily identify areas of high socioeconomic need or food insecurity. Conduent's SocioNeeds Index estimates areas of highest socioeconomic need correlated with poor health outcomes. Conduent's Food Insecurity Index estimates areas of low food accessibility correlated with social and economic hardship. For both indices, counties, zip codes, and census tracts with populations over 300 are assigned index values ranging from zero to 100, where higher values are correlated with highest needs. Understanding communities with highest need and where they are localized is critical to targeting prevention and outreach activities.

### SocioNeeds Index

Conduent's SocioNeeds Index estimates areas of highest socioeconomic need correlated with poor health outcomes. Based on the SocioNeeds Index, in Orange County, zip codes are ranked based on their index value to identify the relative needs, as illustrated by the map in Figure 7. The following zip code had the highest socioeconomic need (as indicated by the darkest shades of green): 22960 (Orange). Table 11 provides the index values for each zip code.

**FIGURE 7. SOCIONEEDS INDEX**

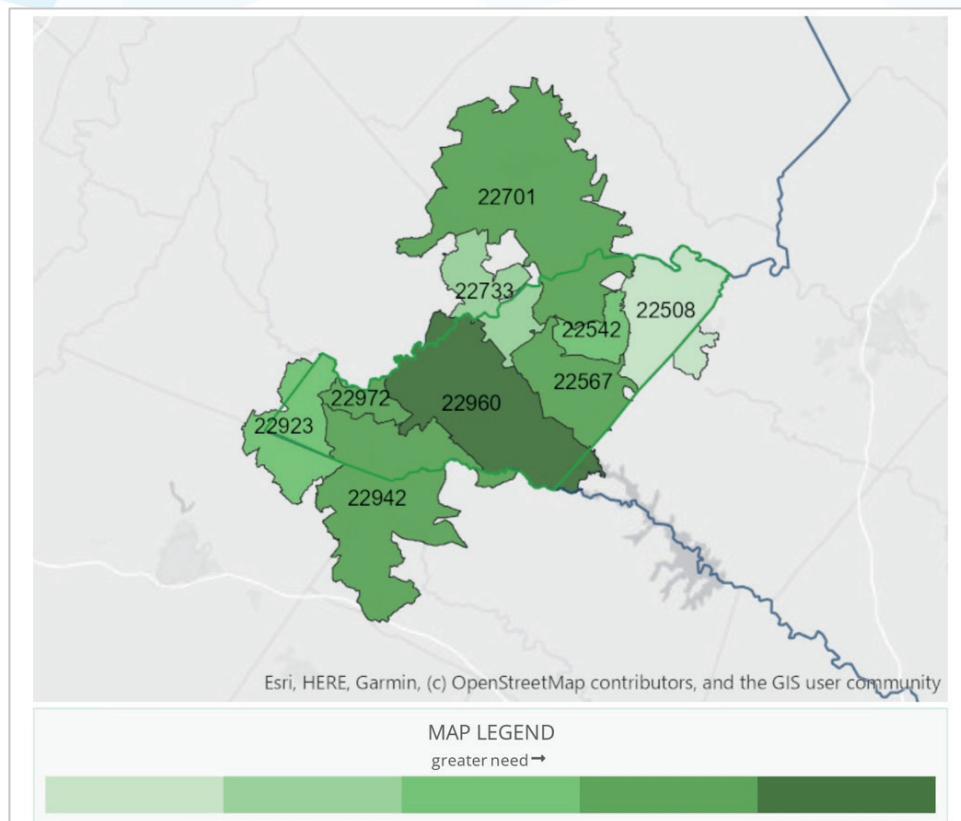

**TABLE 11. SOCIONEEDS INDEX VALUES BY ZIP CODE**

Zip Code	Area Name	Index Value
22960	Orange	63
22567	Unionville	52.1
22542	Rhoadesville	51.9
22733	Rapidan	48.2
22942	Gordonsville	45.7
22701	Culpeper	40
22972	Somerset	26
22923	Barboursville	23.4
22508	Locust Grove	22.6

## Food Insecurity Index

Conduent's Food Insecurity Index estimates areas of low food accessibility correlated with social and economic hardship. Based on the Food Insecurity Index, in Orange County, zip codes are ranked based on their index value to identify needs relative to surrounding zip codes, as illustrated by the map in Figure 8. The following zip code had the highest level of food insecurity (as indicated by the darkest shade of green): 22960 (Orange). Table 12 provides the index values for each zip code.

**FIGURE 8. FOOD INSECURITY INDEX**

**TABLE 12. FOOD INSECURITY INDEX VALUES BY ZIP CODE**

Zip Code	Area Name	Index Value
22960	Orange	62.4
22942	Gordonsville	43.3
22701	Culpeper	40.9
22567	Unionville	37.4
22972	Somerset	37.4

Zip Code	Area Name	Index Value
22542	Rhoadesville	32.6
22923	Barboursville	29.8
22733	Rapidan	23.7
22508	Locust Grove	8.5

# Prince William County, Virginia

## Race/Ethnic & Gender Disparities for Prince William County, VA

Community health disparities were assessed in both the primary and secondary data collection processes. Table 13 below identifies secondary data health indicators with a statistically significant race or ethnic disparity, and gender disparity for Prince William County.

**TABLE 13. INDICATORS WITH SIGNIFICANT RACE/ETHNIC & GENDER DISPARITIES**

Health Indicator	Group Negatively Impacted (highest rates)
Age-Adjusted Death Rate due to Prostate Cancer	Black/African American
Babies with Very Low Birth Weight	Black/African American, Other Race
Cervical Cancer Incidence Rate	Hispanic/Latino
Children Living Below Poverty Level	Multiple Races, Other Race; Hispanic/Latino
Families Living Below Poverty Level	Black/African American, Multiple Races, Other Race; Hispanic/Latino
Infant Mortality Rate	Black/African American, White
People 65+ Living Below Poverty Level	Black/African American, Asian, Other Race; Hispanic/Latino
People Living Below Poverty Level	Black/African American, Multiple Races, Other Race; Hispanic/Latino
Teen Birth Rate	Other Race
Workers Commuting by Public Transportation	White, Other Race; Hispanic/Latino

Health Indicator	Group Negatively Impacted (highest rates)
Workers who Walk to Work	White, Asian, American Indian/Alaska Native, Native Hawaiian/Pacific Islander
Age-Adjusted Death Rate due to Alzheimer's Disease	Female
Age-Adjusted Death Rate due to Diabetes	Male
Age-Adjusted Death Rate due to Influenza and Pneumonia	Male
Age-Adjusted Death Rate due to Suicide	Male
Age-Adjusted Death Rate due to Unintentional Injuries	Male
Age-Adjusted Drug and Opioid-Involved Overdose Death Rate	Male
Melanoma Incidence Rate	Male
Oral Cavity and Pharynx Cancer Incidence Rate	Male

The indicators listed in Table 13 show a statistically significant difference in race or ethnicity according to the Index of Disparity analysis. Secondary data reveal that different race groups are disparately impacted for many poverty-related indicators, which are often associated with poorer health outcomes. Additionally, the Black/African American, Asian, and Hispanic populations are the most negatively impacted race groups in Prince William County, experiencing significant disparities, of indicators listed in Table 13. These important disparities in data should be recognized and considered for implementation planning to mitigate the disparities often faced along racial, ethnic, or cultural lines in Prince William County.

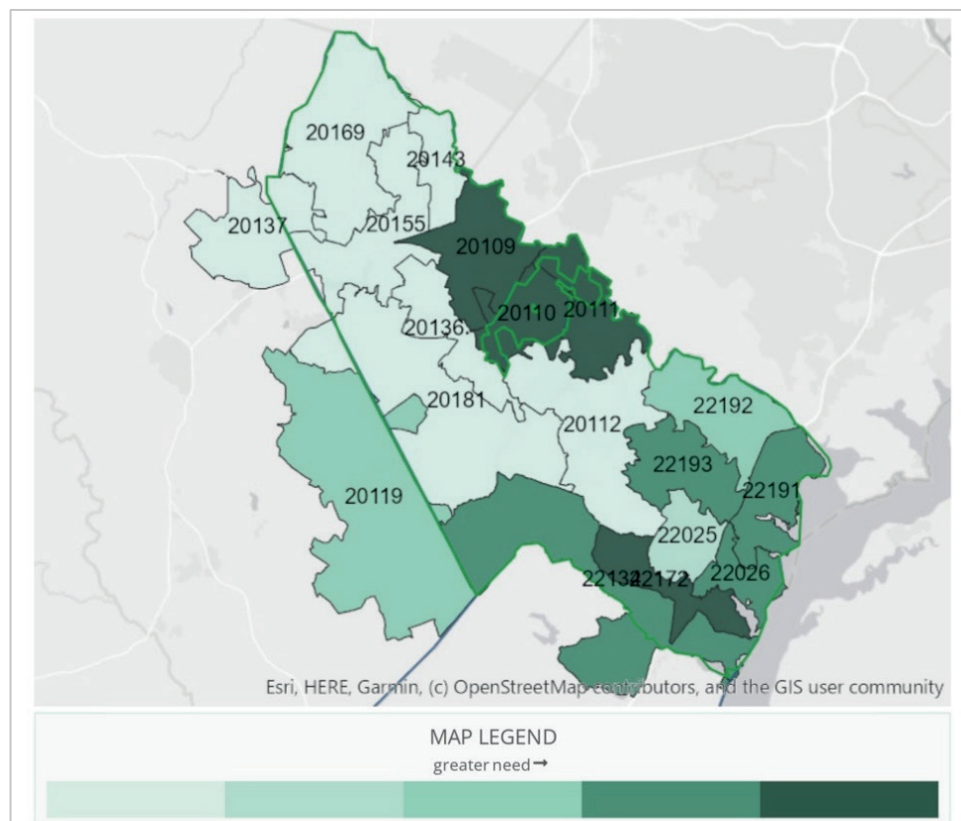

## Geographic Disparities for Prince William County, VA

Geographic disparities were identified using the SocioNeeds Index® and Food Insecurity Index. These indices have been developed by Conduent Healthy Communities Institute to easily identify areas of high socioeconomic need or food insecurity. Conduent's SocioNeeds Index estimates areas of highest socioeconomic need correlated with poor health outcomes. Conduent's Food Insecurity Index estimates areas of low food accessibility correlated with social and economic hardship. For both indices, counties, zip codes, and census tracts with populations over 300 are assigned index values ranging from zero to 100, where higher values are correlated with highest needs. Understanding communities with highest need and where they are localized is critical to targeting prevention and outreach activities.

### SocioNeeds Index

Conduent's SocioNeeds Index estimates areas of highest socioeconomic need correlated with poor health outcomes. Based on the SocioNeeds Index, in Prince William County, zip codes are ranked based on their index value to identify the relative needs, as illustrated by the map in Figure 9. The following zip codes had the highest socioeconomic need (as indicated by the darkest shades of blue): 20109 (Bull Run), 22172 (Triangle), 20111 (Manassas Park), and 20110 (Manassas). Table 14 provides the index values for each zip code.

**FIGURE 9. SOCIONEEDS INDEX**

**TABLE 14. SOCIONEEDS INDEX VALUES BY ZIP CODE**

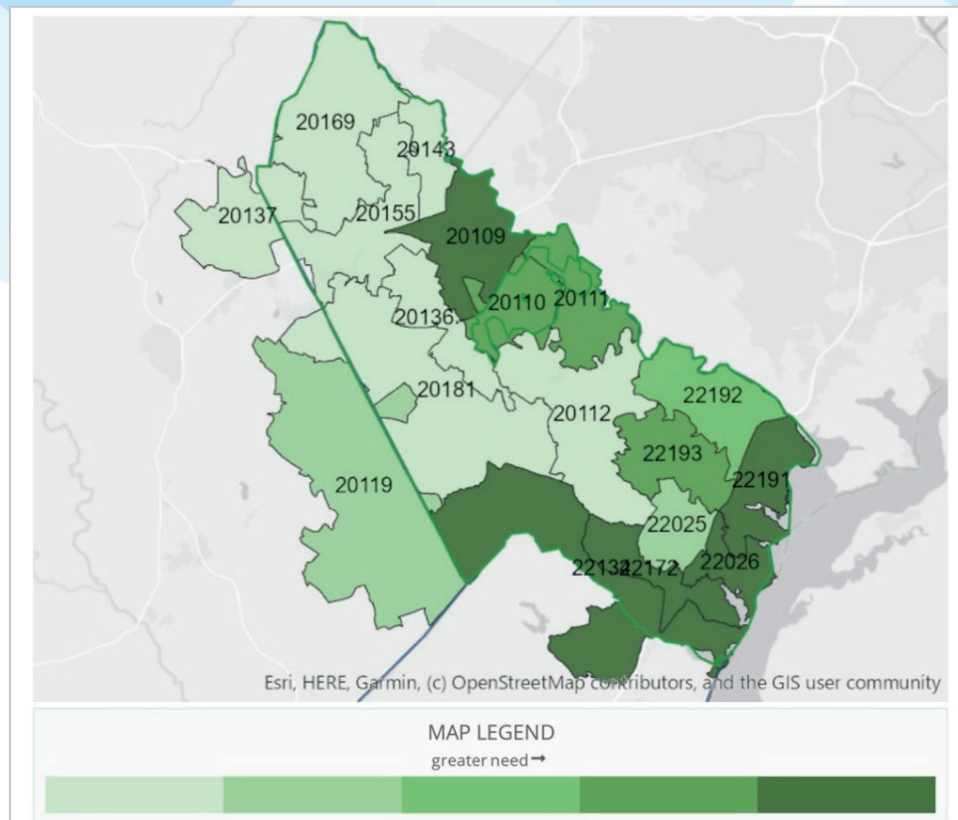

Zip Code	Area Name	Index Value
20109	Bull Run	60.7
22172	Triangle	49.5
20111	Manassas Park	45.2
20110	Manassas	42.6
22191	Woodbridge	35.5
22134	Quantico	35.2
22026	Dumfries	31.4
22193	Dale City	26.9
22192	Lake Ridge	11.8
20119	Catlett	9.5
22025	Montclair	5.4
20181	Nokesville	3.5
20136	Bristow	3
20155	Gainesville	2.6
20112	Woodbine	2.3
20137	Broad Run	2
20169	Haymarket	1.5
20143	Catharpin	1.4

### Food Insecurity Index

Conduent's Food Insecurity Index estimates areas of low food accessibility correlated with social and economic hardship. Based on the Food Insecurity Index, in Prince William County, zip codes are ranked based on their index value to identify needs relative to surrounding zip codes, as illustrated by the map in Figure 10. The following zip codes had the highest level of food insecurity (as indicated by the darkest shades of green): 22172 (Triangle), 20109 (Bull Run), 22026 (Dumfries), 22134 (Quantico), and 22191 (Woodbridge). Table 15 provides the index values for each zip code.

**FIGURE 10. FOOD INSECURITY INDEX**

**TABLE 15. FOOD INSECURITY INDEX VALUES BY ZIP CODE**

Zip Code	Area Name	Index Value
22172	Triangle	57.2
20109	Bull Run	48.2
22026	Dumfries	46.7
22134	Quantico	41.7
22191	Woodbridge	38.8
20110	Manassas	31.1
20111	Manassas Park	23.8
22193	Dale City	22.7
22192	Lake Ridge	16.9
20119	Catlett	7.9

Zip Code	Area Name	Index Value
22025	Montclair	5.5
20136	Bristow	2.9
20137	Broad Run	2.6
20155	Gainesville	2.2
20181	Nokesville	2
20143	Catharpin	1.4
20169	Haymarket	1.1
20112	Woodbine	0.8

# Spotsylvania County, Virginia

## Race/Ethnic & Gender Disparities for Spotsylvania County, VA

Community health disparities were assessed in both the primary and secondary data collection processes. Table 16 below identifies secondary data health indicators with a statistically significant race or ethnic disparity, and gender disparity for Spotsylvania County.

**TABLE 16. INDICATORS WITH SIGNIFICANT RACE/ETHNIC & GENDER DISPARITIES**

<b>Health Indicator</b>	<b>Group Negatively Impacted (highest rates)</b>
<b>Age-Adjusted Death Rate due to Prostate Cancer</b>	Black/African American
<b>Children Living Below Poverty Level</b>	Black/African American, American Indian/Alaska Native, Other Race; Hispanic/Latino
<b>Families Living Below Poverty Level</b>	Black/African American, Asian, American Indian/Alaska Native, Multiple Races, Other Race; Hispanic/Latino
<b>Infant Mortality Rate</b>	Black/African American, White
<b>People 65+ Living Below Poverty Level</b>	Asian, Other Race; Hispanic/Latino
<b>People Living Below Poverty Level</b>	Black/African American, Asian, American Indian/Alaska Native, Native Hawaiian/Pacific Islander, Multiple Races, Other Race; /Hispanic/Latino
<b>Prostate Cancer Incidence Rate</b>	Black/African American
<b>Teen Birth Rate</b>	Black/African American, Other Race
<b>Workers Commuting by Public Transportation</b>	White, Other Race; Hispanic/Latino

<b>Health Indicator</b>	<b>Group Negatively Impacted (highest rates)</b>
<b>Workers who Walk to Work</b>	White, Asian, American Indian/Alaska Native, Native Hawaiian/Pacific Islander, Multiple Races, Other Race; Hispanic/Latino
<b>Age-Adjusted Death Rate due to Diabetes</b>	Male
<b>Age-Adjusted Death rate due to Unintentional Injuries</b>	Male
<b>Age-Adjusted Drug and Opioid-Involved Overdose Death Rate</b>	Male
<b>Mean Travel Time to Work</b>	Male
<b>Melanoma Incidence Rate</b>	Male
<b>Oral Cavity and Pharynx Cancer Incidence Rate</b>	Male
<b>Workers Commuting by Public Transportation</b>	Female

The indicators listed in Table 16 show a statistically significant difference in race or ethnicity according to the Index of Disparity analysis. Secondary data reveal that different race groups are disparately impacted for many poverty-related indicators, which are often associated with poorer health outcomes. Additionally, the Black/African American, Asian, and Hispanic populations are the most negatively impacted race groups in Spotsylvania County, experiencing significant disparities, of indicators listed in Table 16. These important disparities in data should be recognized and considered for implementation planning to mitigate the disparities often faced along racial, ethnic, or cultural lines in Spotsylvania County.

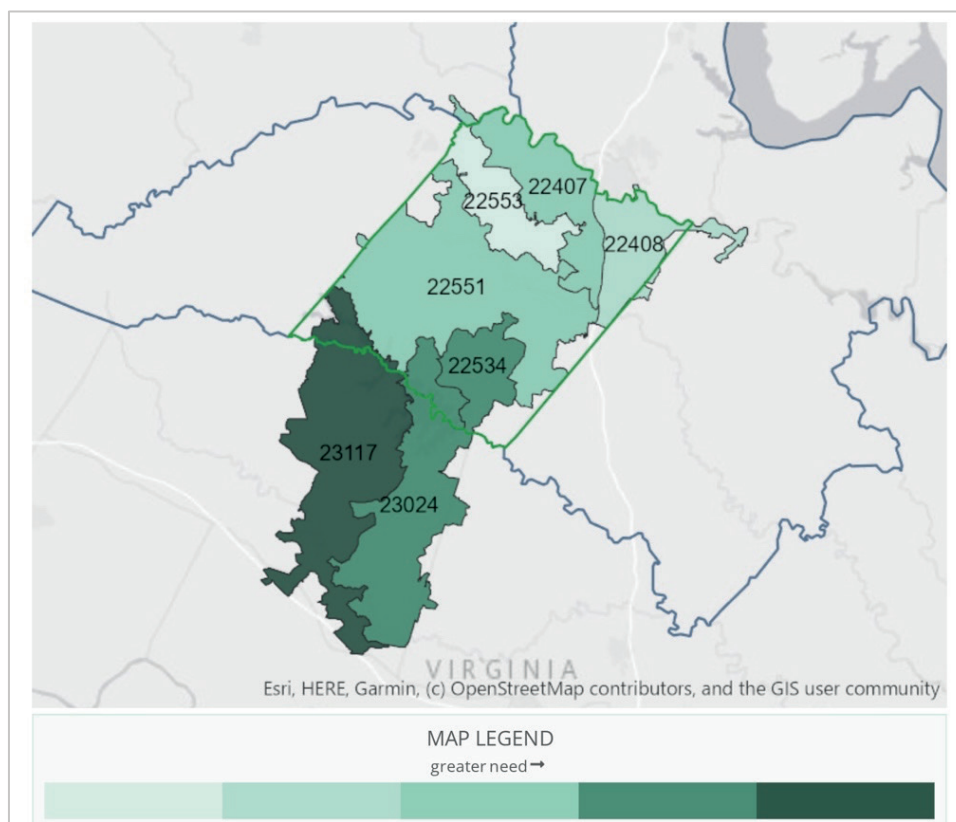

## Geographic Disparities for Spotsylvania County, VA

Geographic disparities were identified using the SocioNeeds Index® and Food Insecurity Index. These indices have been developed by Conduent Healthy Communities Institute to easily identify areas of high socioeconomic need or food insecurity. Conduent's SocioNeeds Index estimates areas of highest socioeconomic need correlated with poor health outcomes. Conduent's Food Insecurity Index estimates areas of low food accessibility correlated with social and economic hardship. For both indices, counties, zip codes, and census tracts with populations over 300 are assigned index values ranging from zero to 100, where higher values are correlated with highest needs. Understanding communities with highest need and where they are localized is critical to targeting prevention and outreach activities.

### SocioNeeds Index

Conduent's SocioNeeds Index estimates areas of highest socioeconomic need correlated with poor health outcomes. Based on the SocioNeeds Index, in Spotsylvania County, zip codes are ranked based on their index value to identify the relative needs, as illustrated by the map in Figure 11. The following zip code had the highest socioeconomic need (as indicated by the darkest shade of green): 23117 (Mineral). Table 17 provides the index values for each zip code.

**FIGURE 11. SOCIONEEDS INDEX**

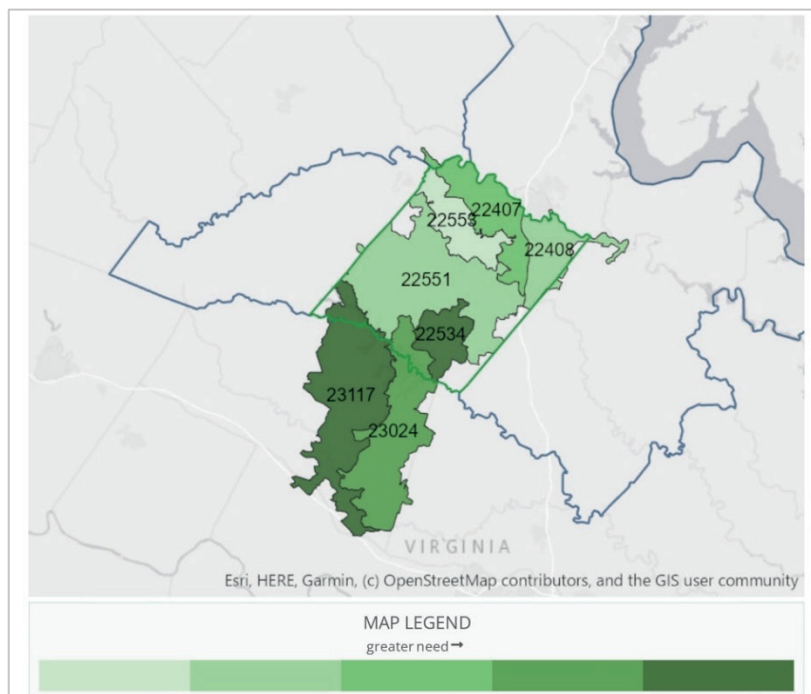

**TABLE 17. SOCIONEEDS INDEX VALUES BY ZIP CODE**

Zip Code	Area Name	Index Value
23117	Mineral	49.2
22534	Partlow	40.6
23024	Bumpass	34.5
22551	Spotsylvania	20.9
22407	Cosner's Corner	19.3
22408	Olive	17.4
22553	Brockroad	12.3

### Food Insecurity Index

Conduent's Food Insecurity Index estimates areas of low food accessibility correlated with social and economic hardship. Based on the Food Insecurity Index, in Spotsylvania County, zip codes are ranked based on their index value to identify needs relative to surrounding zip codes, as illustrated by the map in Figure 12. The following zip codes had the highest level of food insecurity (as indicated by the darkest shades of green): 23117 (Mineral) and 22534 (Partlow). Table 18 provides the index values for each zip code.

**Figure 12. Food insecurity index**

**TABLE 18. FOOD INSECURITY INDEX VALUES BY ZIP CODE**

Zip Code	Area Name	Index Value
23117	Mineral	35.2
22534	Partlow	32.5
23024	Bumpass	29.5
22407	Cosner's Corner	22.5

# Stafford County, Virginia

## Race/Ethnic & Gender Disparities for Stafford County, VA

Community health disparities were assessed in both the primary and secondary data collection processes. Table 19 below identifies secondary data health indicators with a statistically significant race or ethnic disparity, and gender disparity for Stafford County.

**TABLE 19. INDICATORS WITH SIGNIFICANT RACE/ETHNIC & GENDER DISPARITIES**

Health Indicator	Group Negatively Impacted (highest rates)
Babies with Very Low Birth Weight	Black/African American, Other Race
Families Living Below Poverty Level	Black/African American, Asian, Multiple Races, Other Race; Hispanic/Latino
Infant Mortality Rate	Black/African American
People 65+ Living Below Poverty Level	Multiple Races; Hispanic/Latino
People Living Below Poverty Level	Black/African American, Asian, Native Hawaiian/Pacific Islander, Multiple Races, Other Race; Hispanic/Latino
Teen Birth Rate	Other Race
Workers Commuting by Public Transportation	White, Other Race; Hispanic/Latino
Workers who Walk to Work	Black/African American, Asian, American Indian/Alaska Native, Native Hawaiian/Pacific Islander, Multiple Races
Age-Adjusted Death Rate due to Alzheimer's Disease	Female
Age-Adjusted Death Rate due to Unintentional Injuries	Male
Age-Adjusted Drug and Opioid-Involved Overdose Death Rate	Male

Health Indicator	Group Negatively Impacted (highest rates)
Oral Cavity and Pharynx Cancer Incidence Rate	Male
People Living Below Poverty Line	Female
Workers Commuting by Public Transportation	Female
Workers who Walk to Work	Female

The indicators listed in Table 19 show a statistically significant difference in race or ethnicity according to the Index of Disparity analysis. Secondary data reveal that different race groups are disparately impacted for many poverty-related indicators, which are often associated with poorer health outcomes. Additionally, the Black/African American, Asian, and Hispanic populations are the most negatively impacted race groups in Stafford County, experiencing significant disparities, of indicators listed in Table 19. These important disparities in data should be recognized and considered for implementation planning to mitigate the disparities often faced along racial, ethnic, or cultural lines in Stafford County.

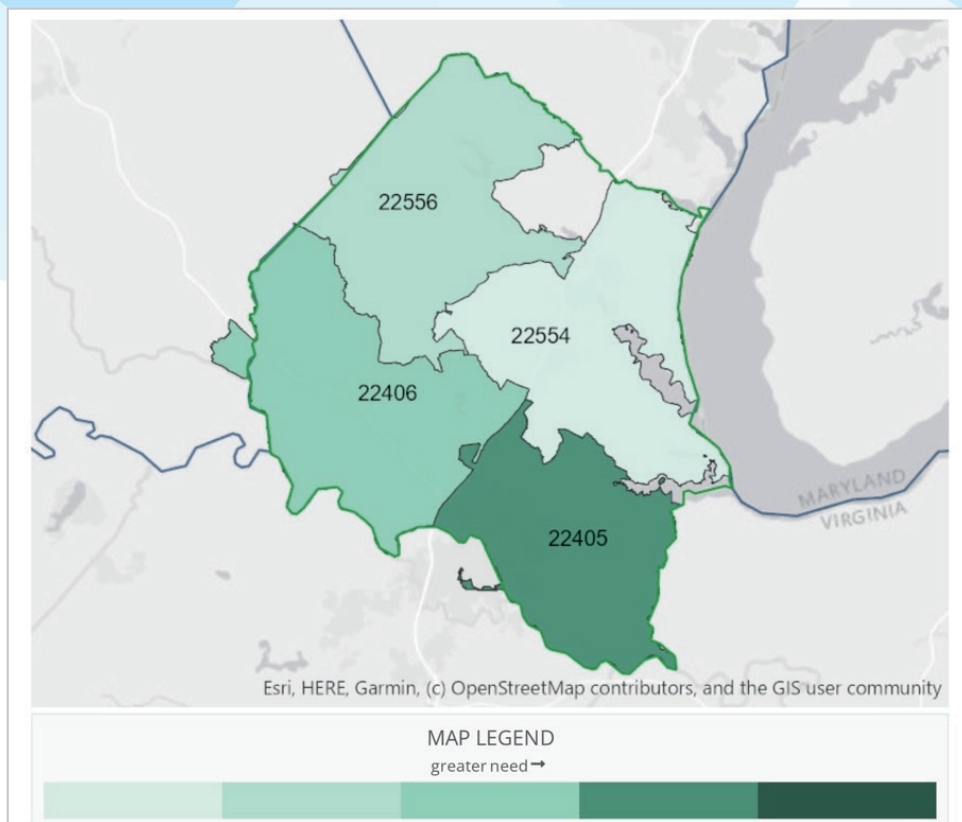

## Geographic Disparities for Stafford County, VA

Geographic disparities were identified using the SocioNeeds Index® and Food Insecurity Index. These indices have been developed by Conduent Healthy Communities Institute to easily identify areas of high socioeconomic need or food insecurity. Conduent's SocioNeeds Index estimates areas of highest socioeconomic need correlated with poor health outcomes. Conduent's Food Insecurity Index estimates areas of low food accessibility correlated with social and economic hardship. For both indices, counties, zip codes, and census tracts with populations over 300 are assigned index values ranging from zero to 100, where higher values are correlated with highest needs. Understanding communities with highest need and where they are localized is critical to targeting prevention and outreach activities.

### SocioNeeds Index

Conduent's SocioNeeds Index estimates areas of highest socioeconomic need correlated with poor health outcomes. Based on the SocioNeeds Index, in Stafford County, zip codes are ranked based on their index value to identify the relative needs, as illustrated by the map in Figure 13. The following zip code had the highest socioeconomic need (as indicated by the darkest shades of green): 22405 (Falmouth). Table 20 provides the index values for each zip code.

**FIGURE 13. SOCIONEEDS INDEX**

**TABLE 20. SOCIONEEDS INDEX VALUES BY ZIP CODE**

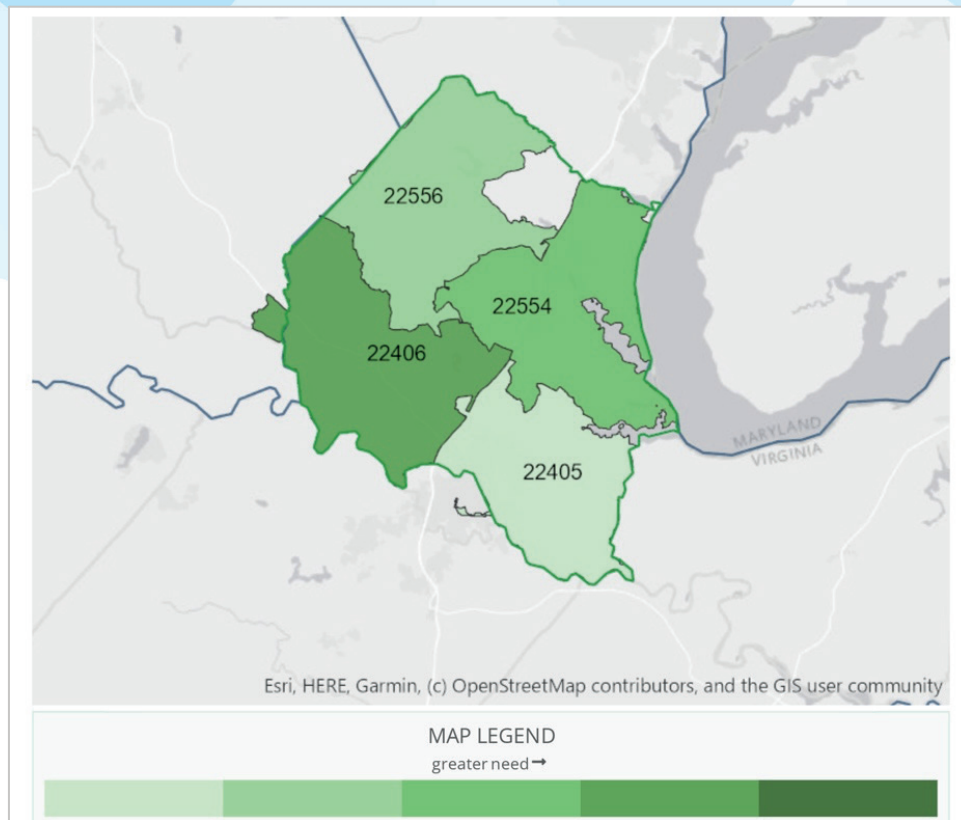

Zip Code	Area Name	Index Value
22405	Falmouth	10.9
22406	Hartwood	10.1
22556	Ruby	7.6
22554	Stafford	7.2

### Food Insecurity Index

Conduent's Food Insecurity Index estimates areas of low food accessibility correlated with social and economic hardship. Based on the Food Insecurity Index, in Stafford County, zip codes are ranked based on their index value to identify needs relative to surrounding zip codes, as illustrated by the map in Figure 14. The following zip code had the highest level of food insecurity (as indicated by the darkest shades of green): 22406 (Hartwood). Table 21 provides the index values for each zip code.

**FIGURE 14. FOOD INSECURITY INDEX**

# Westmoreland County, Virginia

## Race/Ethnic & Gender Disparities for Westmoreland County, VA

Community health disparities were assessed in both the primary and secondary data collection processes. Table 22 below identifies secondary data health indicators with a statistically significant race or ethnic disparity, and gender disparity for Westmoreland County.

**TABLE 22. INDICATORS WITH SIGNIFICANT RACE/ETHNIC & GENDER DISPARITIES**

Health Indicator	Group Negatively Impacted (highest rates)
Babies with Very Low Birth Weight	Black/African American
Children Living Below Poverty Level	Black/African American
Families Living Below Poverty Level	Black/African American, Multiple Races
Infant Mortality Rate	White
People 25+ with a Bachelor's Degree or Higher	Black/African American, American Indian/Alaska Native, Native Hawaiian/Pacific Islander, Other Race
People 65+ Living Below Poverty Level	White; Hispanic/Latino
Teen Birth Rate	Other Race
Workers who Walk to Work	Black/African American, American Indian/Alaska Native, Other Race; Hispanic/Latino
Children Living Below Poverty Level	Female
Workers who Walk to Work	Female
4 <sup>th</sup> Grade Students Proficient in Math	Female

Health Indicator	Group Negatively Impacted (highest rates)
8 <sup>th</sup> Grade Students Proficient in Math	Male
Workers Commuting by Public Transportation	Female
Age-Adjusted Death Rate due to Lung Cancer	Male

The indicators listed in Table 22 show a statistically significant difference in race or ethnicity according to the Index of Disparity analysis. Secondary data reveal that different race groups are disparately impacted for many poverty-related indicators, which are often associated with poorer health outcomes. Additionally, the Black/African American, Asian, and Hispanic populations are the most negatively impacted race groups in Westmoreland County, experiencing significant disparities, of indicators listed in Table 22. These important disparities in data should be recognized and considered for implementation planning to mitigate the disparities often faced along racial, ethnic, or cultural lines in Westmoreland County.

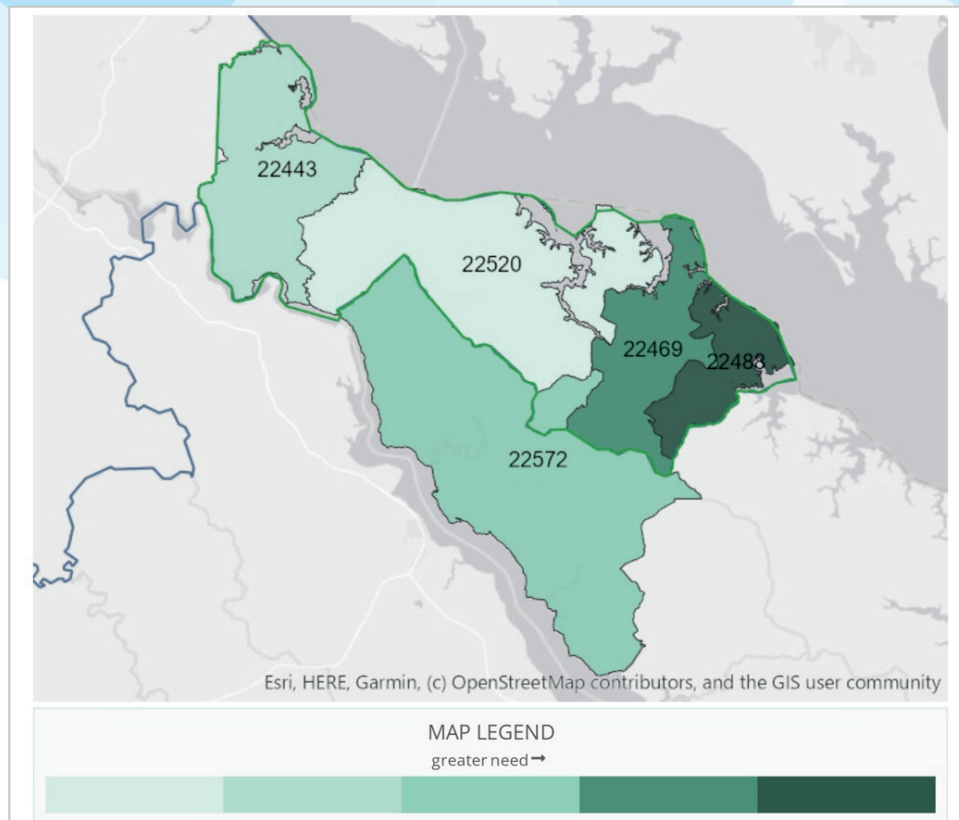

## Geographic Disparities for Westmoreland County, VA

Geographic disparities were identified using the SocioNeeds Index® and Food Insecurity Index. These indices have been developed by Conduent Healthy Communities Institute to easily identify areas of high socioeconomic need or food insecurity. Conduent's SocioNeeds Index estimates areas of highest socioeconomic need correlated with poor health outcomes. Conduent's Food Insecurity Index estimates areas of low food accessibility correlated with social and economic hardship. Understanding communities with highest need and where they are localized is critical to targeting prevention and outreach activities.

### SocioNeeds Index

Conduent's SocioNeeds Index estimates areas of highest socioeconomic need correlated with poor health outcomes. Based on the SocioNeeds Index, in Westmoreland County, zip codes are ranked based on their index value to identify the relative needs, as illustrated by the map in Figure 15. The following zip code had the highest socioeconomic need (as indicated by the darkest shades of green): 22488 (Kinsale). Table 23 provides the index values for each zip code.

**FIGURE 15. SOCIONEEDS INDEX**

**TABLE 23. SOCIONEEDS INDEX VALUES BY ZIP CODE**

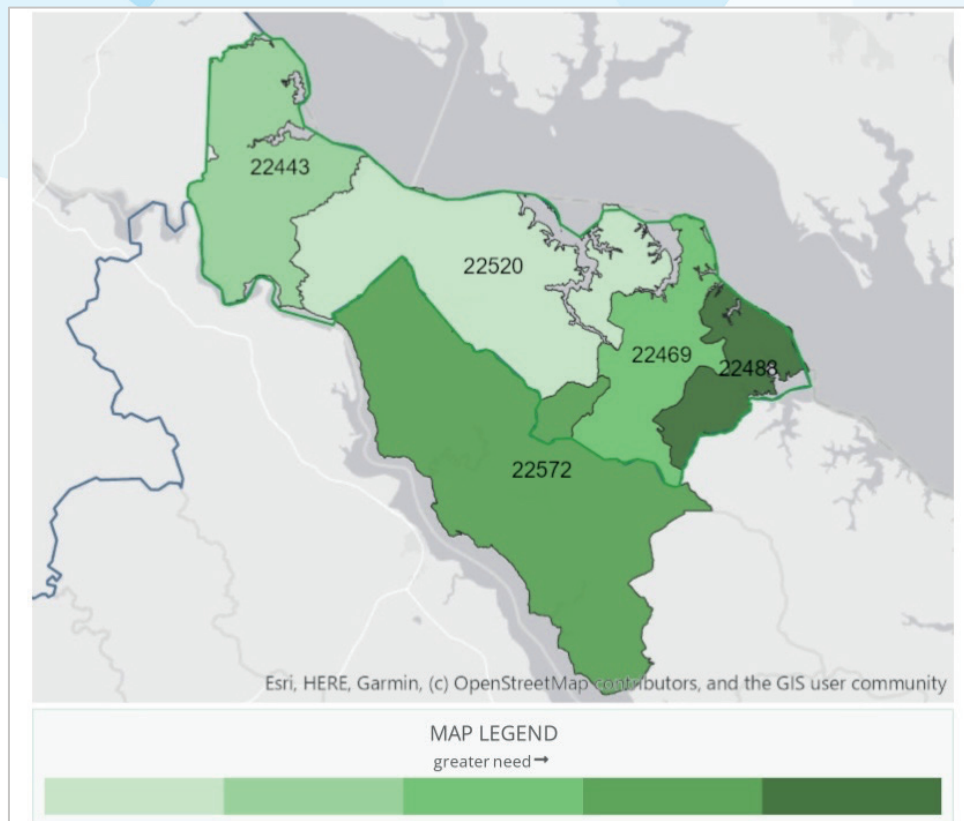

Zip Code	Area Name	Index Value
22488	Kinsale	89.1
22469	Hague	66.1
22572	Warsaw	57.1
22443	Colonial Beach	52.6
22520	Montross	38.3

### Food Insecurity Index

Conduent's Food Insecurity Index estimates areas of low food accessibility correlated with social and economic hardship. Based on the Food Insecurity Index, in Westmoreland County, zip codes are ranked based on their index value to identify needs relative to surrounding zip codes, as illustrated by the map in Figure 16. The

following zip code had the highest level of food insecurity (as indicated by the darkest shades of green): 22488 (Kinsale). Table 24 provides the index values for each zip code.

**FIGURE 16. FOOD INSECURITY INDEX**

**TABLE 24. FOOD INSECURITY INDEX VALUES BY ZIP CODE**

Zip Code	Area Name	Index Value
22488	Kinsale	67.2
22572	Warsaw	60.2
22469	Hague	49.6
22443	Colonial Beach	37.7
22520	Montross	34.4

## Future Considerations

While identifying barriers and disparities are critical components in assessing the needs of a community, it is equally important to understand the social determinants of health and other upstream factors that influence a community's health. The challenges and barriers faced by a community must be balanced by identifying practical, community-driven solutions. Together, these factors come together to inform and focus strategies to positively impact a community's health. The findings of this disparity and health equity analysis for those counties served by Mary Washington Healthcare will be incorporated into findings from the broader Community Health Needs Assessment (CHNA) implemented across the counties in their service area to inform the selection of top health needs and future strategy planning.
